16 Questions 18

# 1 Open your contractor’s link

Your contractor sent you a link by text or email. It works on any phone, tablet or computer. No app to download.

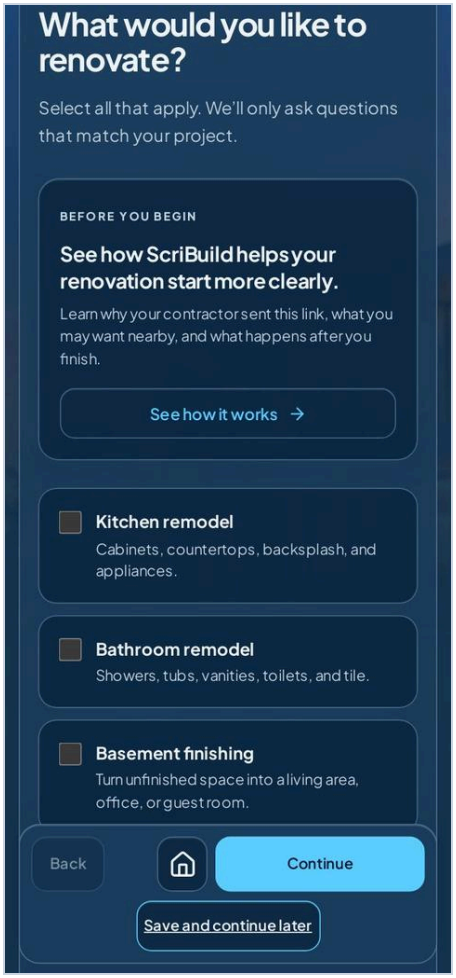

The first page shows your contractor’s name and logo and the three things you’ll do: tell them about each room (rough sizes are fine), add photos if you have them (optional), and see an Instant Quote based on their rates. Nothing is booked yet. Tap **Get started**.

Your contractor’s request page

# 2 Choose what you want to renovate

Check every type of work that applies, for example **Bathroom remodel**. You’ll only get questions that match what you pick. Your contractor may also list their own services (like Install GFCI). If you’re unsure, choose **I’m not sure yet**. Tap **Continue**.

What would you like to renovate?

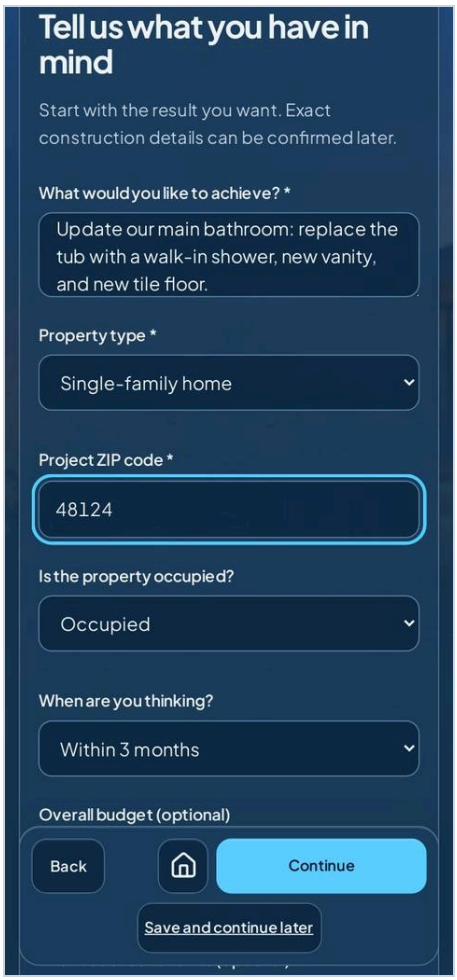

Bathroom remodel selected

**TIP** You can stop at any time with **Save and continue later**, and the step tabs at the top let you go back to any step.

# 3 Tell them what you have in mind

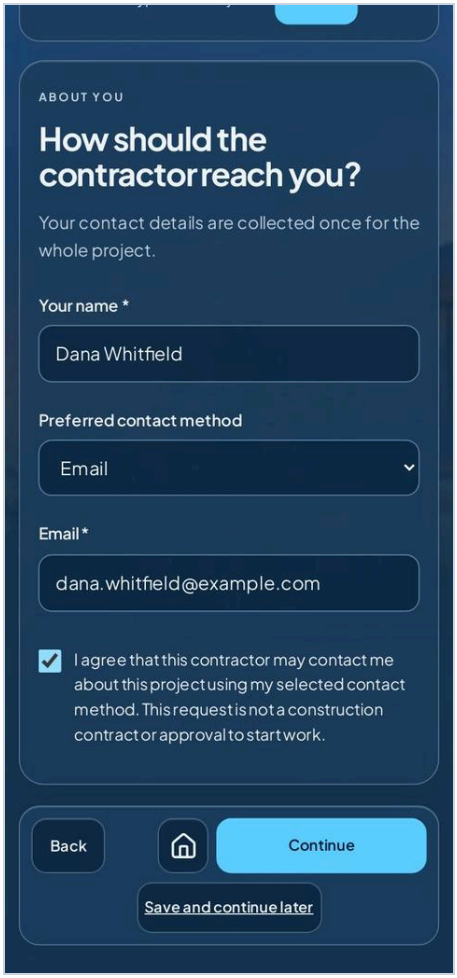

Describe the result you want, in your own words. The idea chips (New paint, New flooring, Better lighting…) help you get started. Then pick the **Property type**, enter the **Project ZIP code**, say whether the home is occupied, and when you're thinking of starting. A budget and priorities are optional. Tap **Continue**.

Tell us what you have in mind

## 4 Your contact details

Enter your name and how you prefer to be contacted (Email, Text or Phone), then tick the box that lets this contractor contact you about the project. This is not a contract and doesn't approve any work. Tap **Continue**.

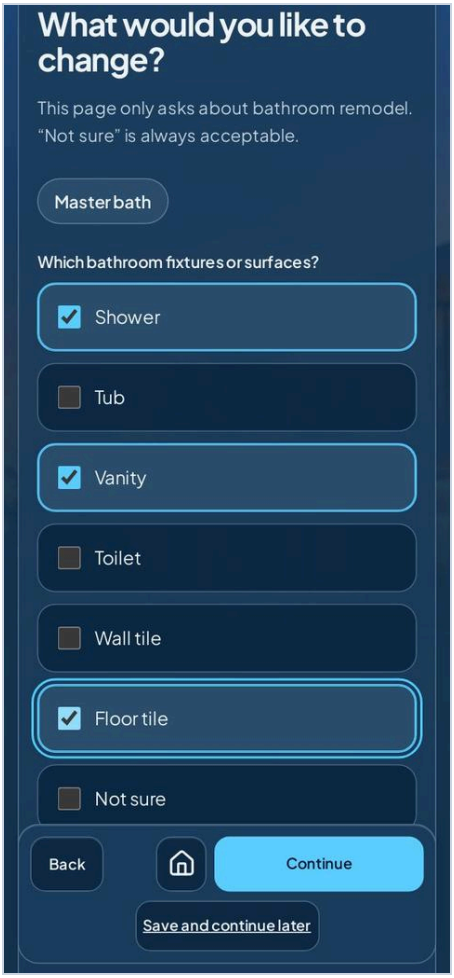

How should the contractor reach you?

## 5 Your rooms and a few questions

Name the room or area (tap a suggestion like **Master bath** or type your own) and check the work that belongs there. **+ Add another area** adds more rooms. Next, answer a few questions about each room, such as which fixtures, replace or refresh, and keep or move fixtures. “Not sure” is always fine.

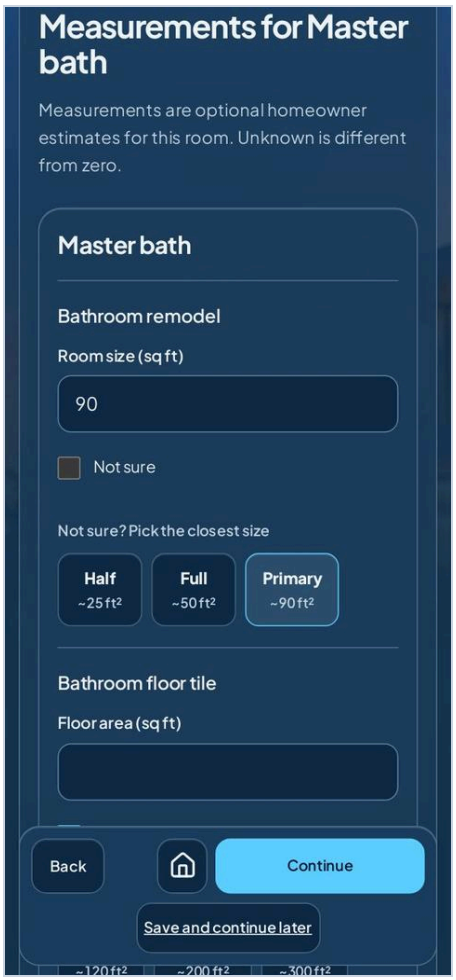

Which room or area?

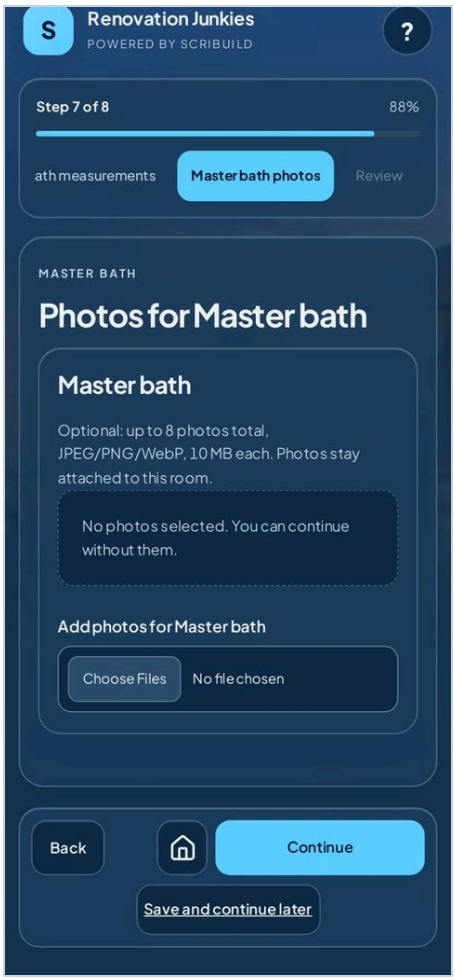

What would you like to change?

## 6 Sizes and photos (both optional)

Enter rough sizes if you know them. If not, tick **Not sure** or tap the closest size, such as **Half**, **Full** or **Primary**. Then add up to 8 photos (JPEG, PNG or WebP, up to 10 MB each). Photos help your contractor prepare, but you can continue without them.

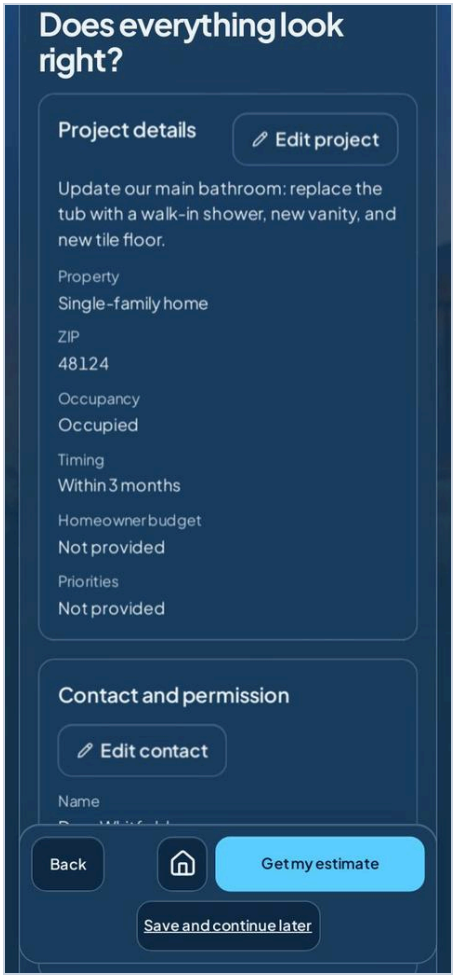

Rough sizes

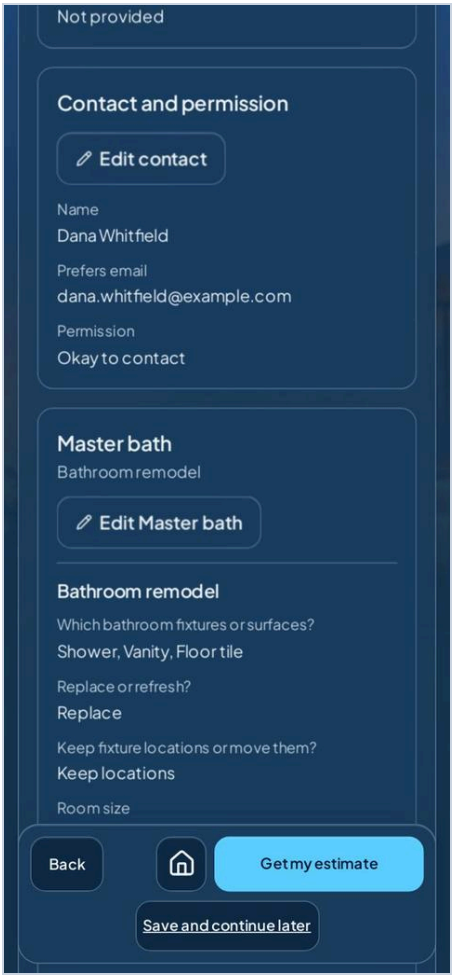

Add photos

## 7 Check everything and get your Instant Quote

The **Final review** shows everything you entered. Tap **Edit** on any part to fix it. When it looks right, tap **Get my estimate**.

Does everything look right?

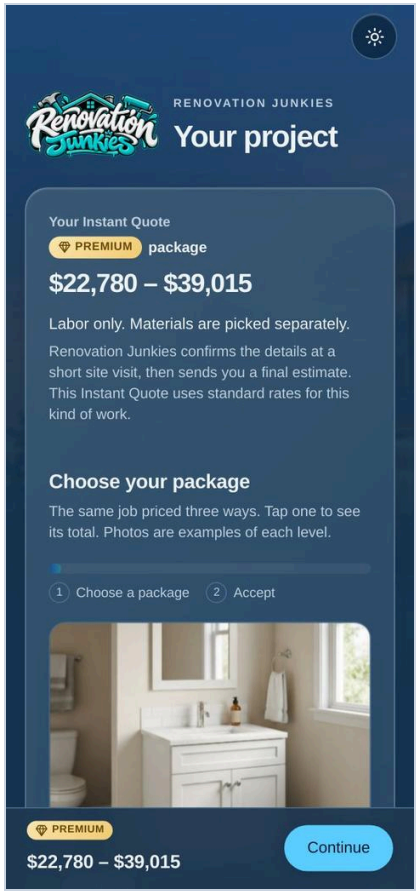

Your rooms and answers

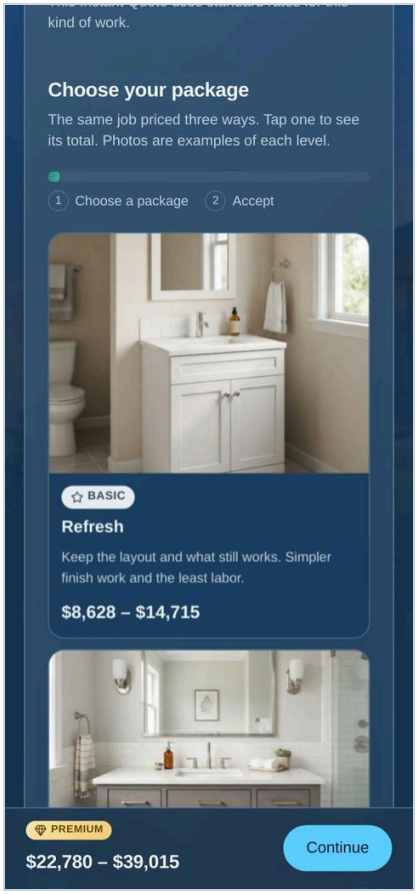

# 8 Your Instant Quote: compare, ask, accept

Right away you'll see an Instant Quote based on your contractor's rates. It's **labor only**. Materials are picked separately, and the final price comes after a short site visit.

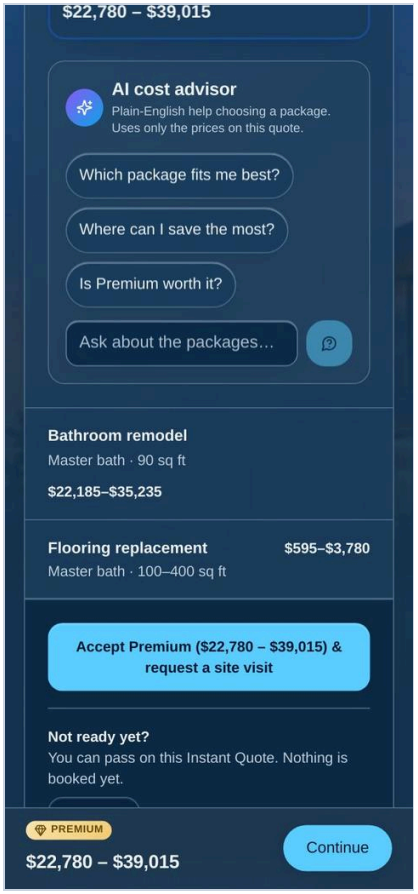

1. Compare the three packages: **Basic** (refresh), **Standard** (update) and **Premium** (full remodel). Tap one to see its total. The photos are examples of each level. The package closest to what you described is marked.
2. Questions? Ask the **AI cost advisor**, for example "Which package fits me best?". It uses only the prices on your quote.
3. When you're ready, tap **Accept [package] & request a site visit**. The bar at the bottom always shows your current choice and total.
4. Not ready? Tap **Decline**. You can tell your contractor why (optional). Nothing is booked.

# 9 Save your project page and send messages

Your project page is your home base. Tap **Copy project link** or bookmark it to come back any time. Use **Project messages** to ask questions or share details. Your contractor replies there (the page updates every 15 seconds while it's open). These messages stay in the app. No text or email is sent, so check back on your page.

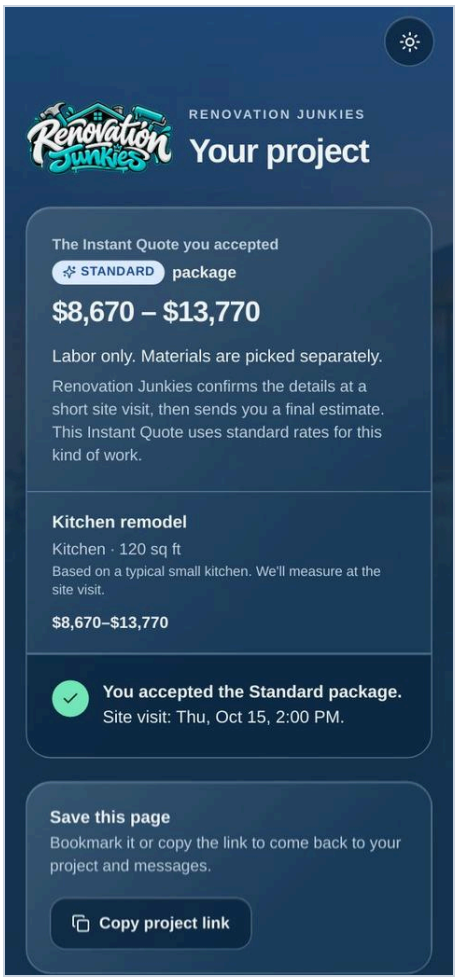

Save this page

Message your contractor

# 10 The site visit

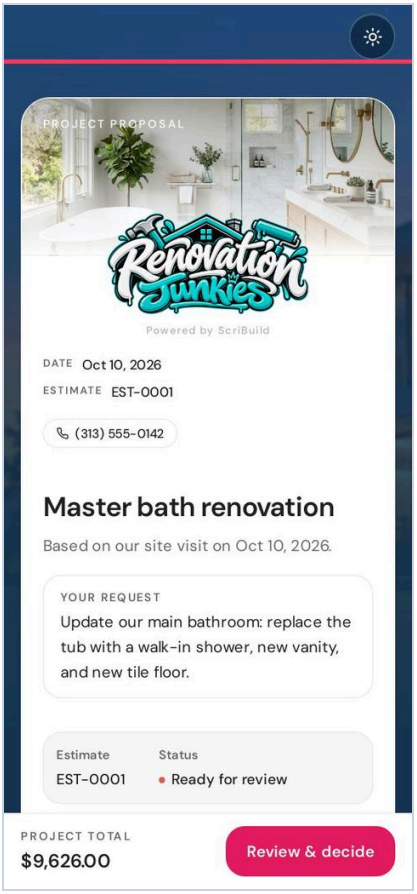

After you accept, your contractor books a short site visit. The date and time show on your project page. At the visit they confirm the work and take real measurements, then send you a final estimate.

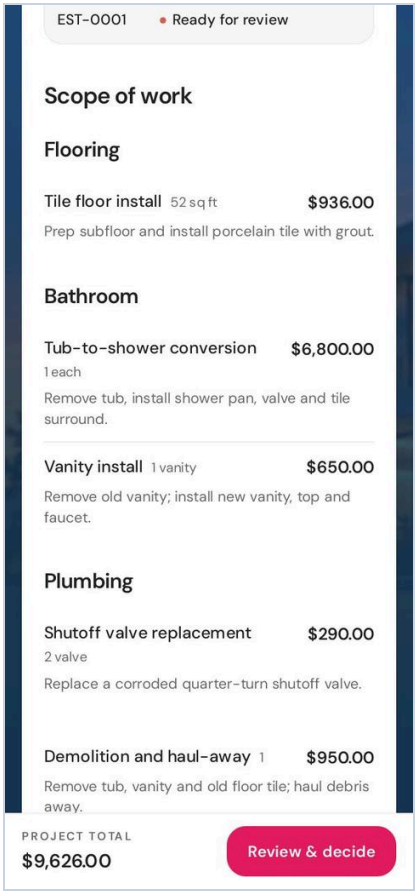

Your site visit time

## 11 Review your final estimate

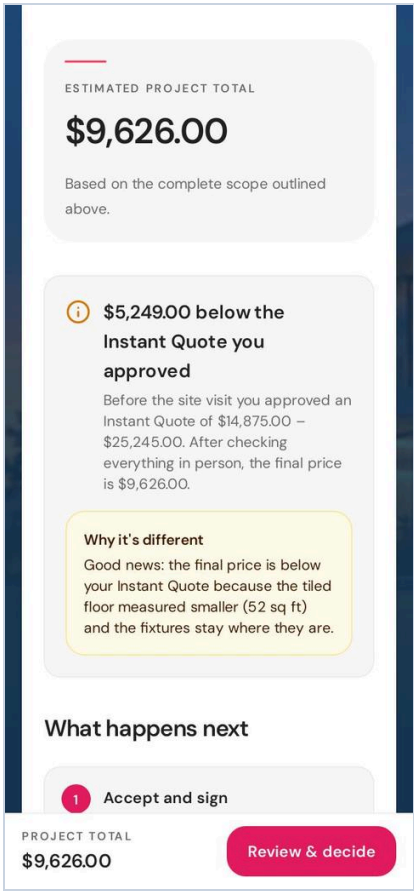

Your contractor sends you a private link to your final estimate. It shows the scope of work line by line, the total, and how it compares with the Instant Quote you approved, with their explanation if it’s different. “What happens next” explains the last steps.

Scope of work

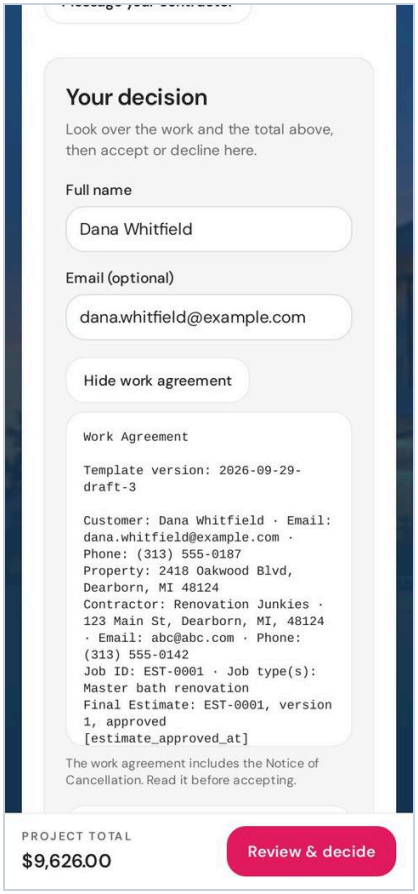

Total and why it's different

# 12 Read the agreement, sign and accept

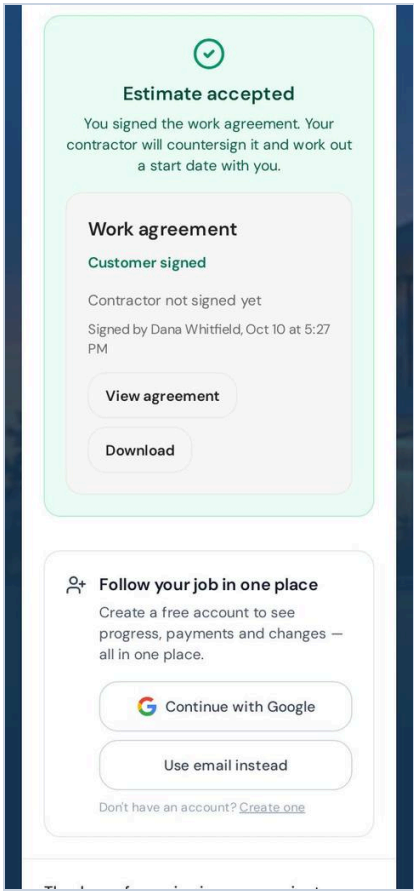

1. Tap **Read the work agreement** and read it. It includes the Notice of Cancellation.
2. Type your full name (email is optional).
3. Tick the box confirming you've read the agreement, the final estimate and the Notice of Cancellation, and agree to sign electronically.
4. Tap **Accept estimate**, or **Decline** if it isn't right for you.

Read the work agreement

Sign

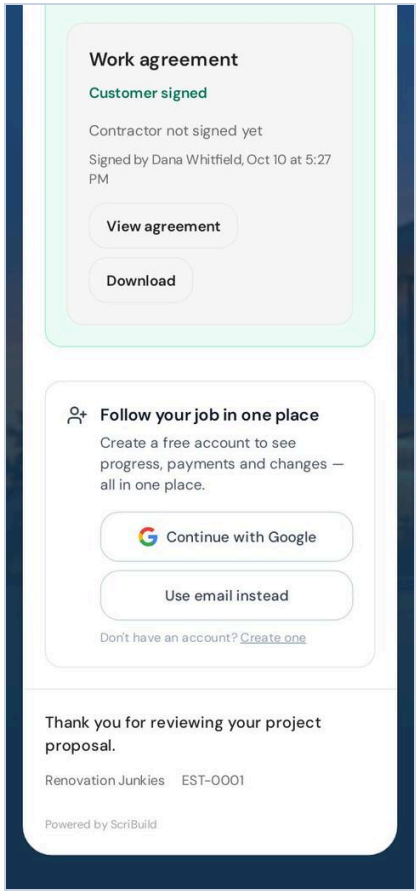

Estimate accepted

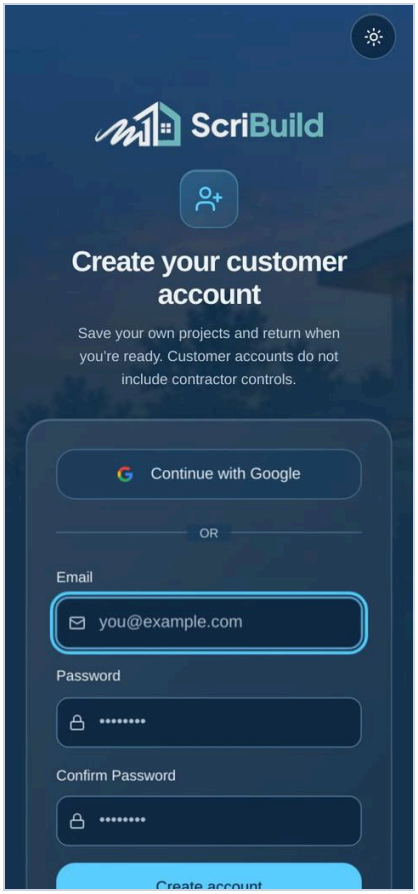

After you accept, your contractor countersigns and works out a start date with you. **View agreement** and **Download** keep a copy.

## 13 Create your free account

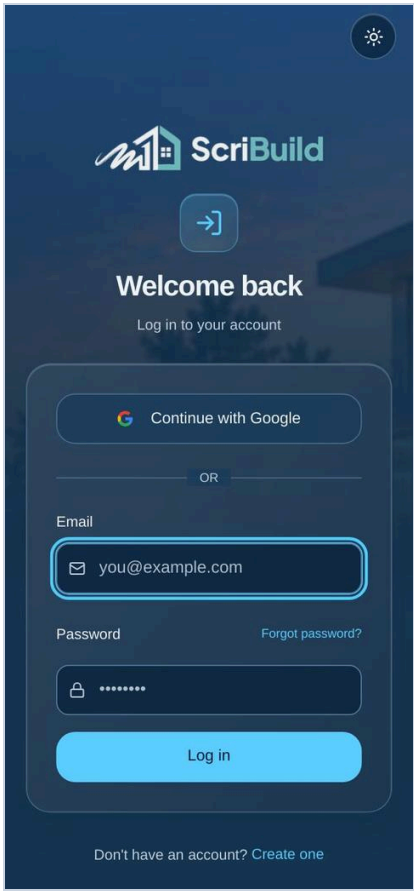

On the accepted estimate, tap **Continue with Google** or **Use email instead** to create a free account. It links your job, so you can follow progress, payments and changes in one place. Next time, sign in at the customer login.

# 14 Follow your job

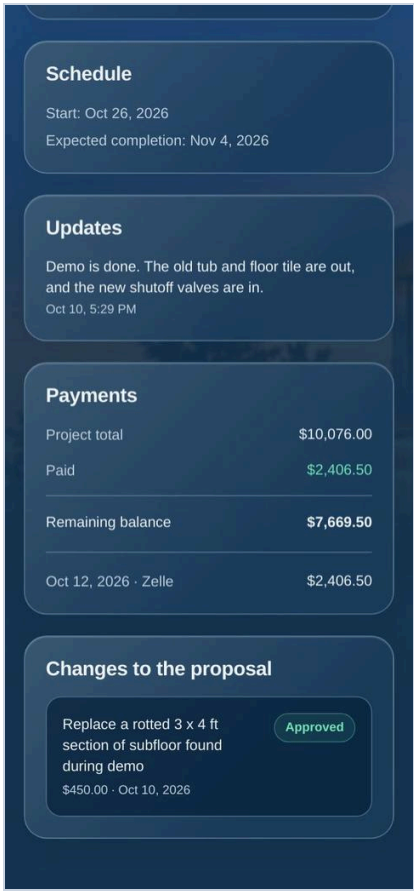

- **My projects** lists your active jobs with progress and balance due.
- Each job shows progress by phase, the schedule, before and after photos, and updates your contractor shares.
- **Needs your approval**: if a change comes up (for example a hidden condition found during demo), you'll see what changed, the cost and the schedule impact. Add an optional note and tap **Approve** or **Decline**.
- **Payments**: project total, what you've paid and the remaining balance.

Approve or decline a change

## 15 Invoices and paying

For smaller jobs your contractor may send an invoice link. It shows the work done and the total due. Under “How to pay” you’ll see the payment methods they accept (for example Cash App or cash), with a copy button. Include the invoice number with your payment. Questions? Call or email your contractor from the invoice.

# 16 Questions

| Question | Answer |
|---|---|
| Is the Instant Quote my final price? | No. It’s a labor-only range from your contractor’s rates. The final price comes after the site visit. |
| Does accepting the Instant Quote commit me? | No. It only asks for a site visit. You sign only when you accept the final estimate and agreement. |
| I lost my link. | Ask your contractor to resend it, or sign in to your customer account if you made one. |
| Can I change my answers? | Before you submit, use Edit on the review page. After that, message your contractor. |
| Will I get texts or emails from the app? | No. Your contractor contacts you directly. Check your project page for messages. |
| Who sees my information? | Your request goes to your contractor. Your permission to be contacted covers this project only. |
