1 Getting started

What ScriBuild does for your business, how to sign in, and how to find your way around.

1.1 How ScriBuild works, start to finish

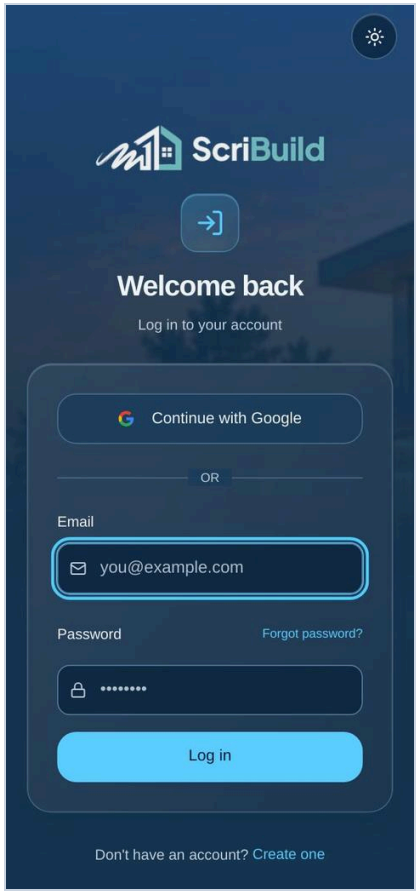

ScriBuild takes a customer from first contact to a paid, finished job. You send one link. The customer describes the project and gets an Instant Quote. You confirm everything at a short site visit, send a final estimate with a work agreement, and run the job, payments and change orders in one place. Small one-off jobs go through Quick invoices instead.

You **1. Send your link** Text, email or share your customer link or QR code.	Customer **2. Describe the project** Work types, rooms, sizes and photos, about 5 minutes.	Customer **3. Instant Quote** Basic, Standard and Premium totals. They accept one or decline.	You **4. Site visit** Book the visit, then do the on-site check and confirm the real measurements.	You **5. Final estimate** Build line items, preview, and send with the work agreement.
Customer **6. Accept & sign** The customer reads the agreement and signs on their phone.	You **7. Countersign & schedule** Sign, pick a start date, and it becomes a Job.	You **8. Run the job** Progress, payments, change orders, materials, updates.	Customer **9. Follow along** Approve changes, see progress and payments in their account.	You **10. Get paid** Record payments, export to Excel or QuickBooks. Use Quick invoices for small jobs.

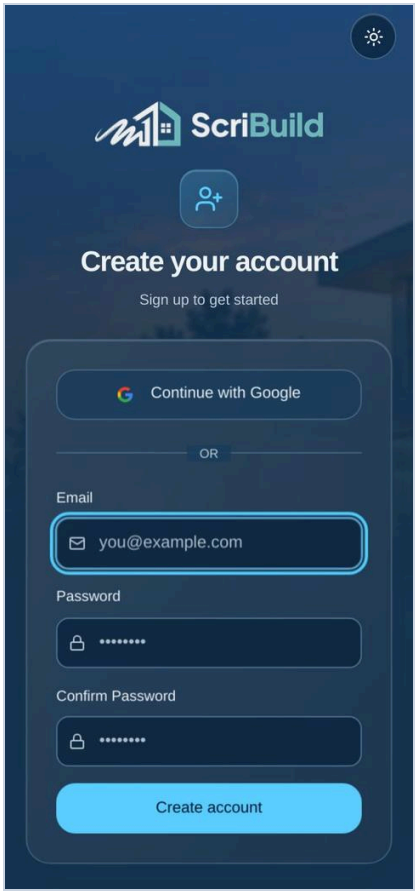

GOOD TO KNOW Every screenshot in this manual is from the ScriBuild app. They show the Renovation Junkies company with **sample customers** (Dana Whitfield, Marcus Lee, Priya Shah and Kevin Brooks) so you can follow one real project from start to finish. Your screens show your own company and customers.

1.2 Sign in, create an account, reset your password

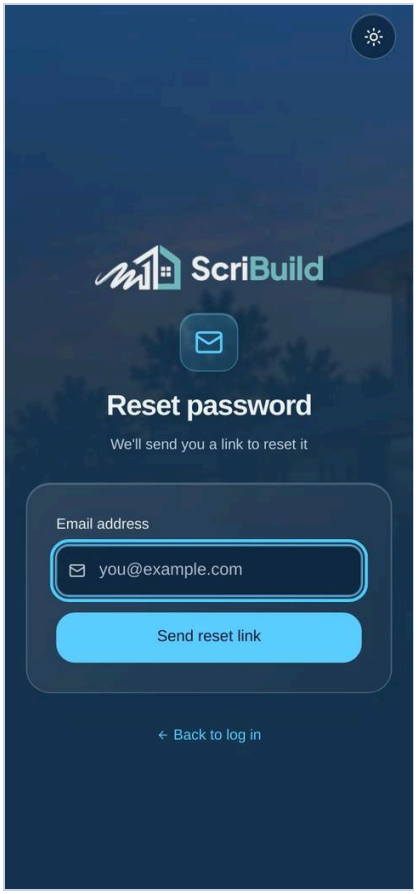

1. Open ScriBuild and tap **Log in**. Use **Continue with Google** or your email and password.
2. New to ScriBuild? Tap **Create one** on the login screen, enter your email and a password, and tap **Create account**.
3. Forgot your password? Tap **Forgot password?**, enter your email and tap **Send reset link**.

Log in

Create your account

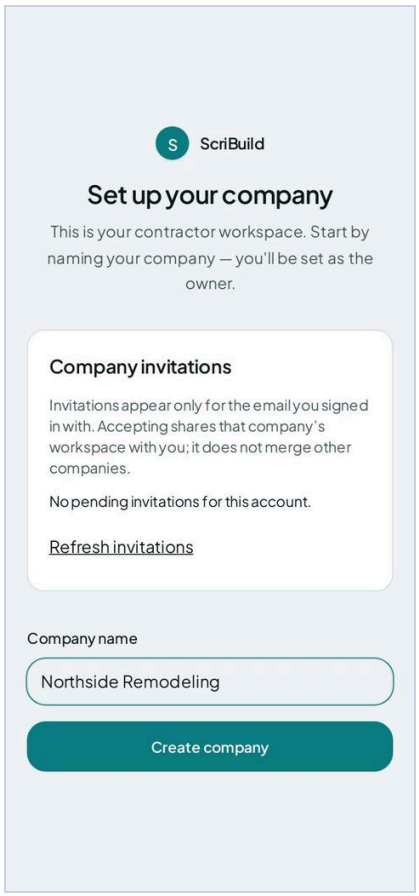

Reset password

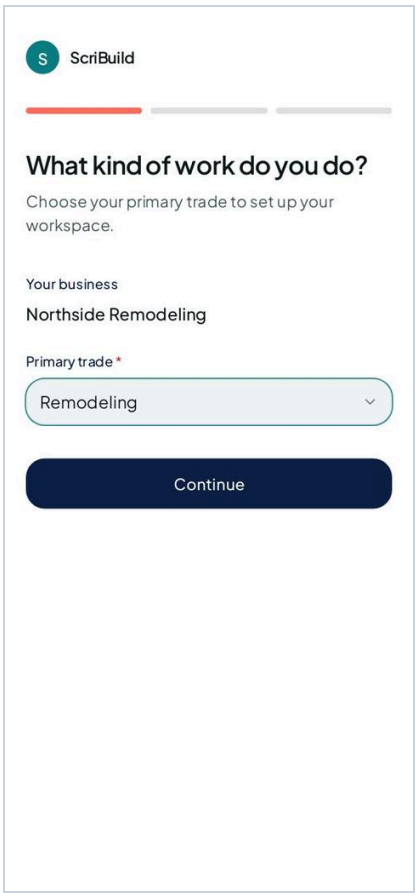

1.3 First-time company setup

The first time you sign in, ScriBuild walks you through four short steps. You become the company **Owner**.

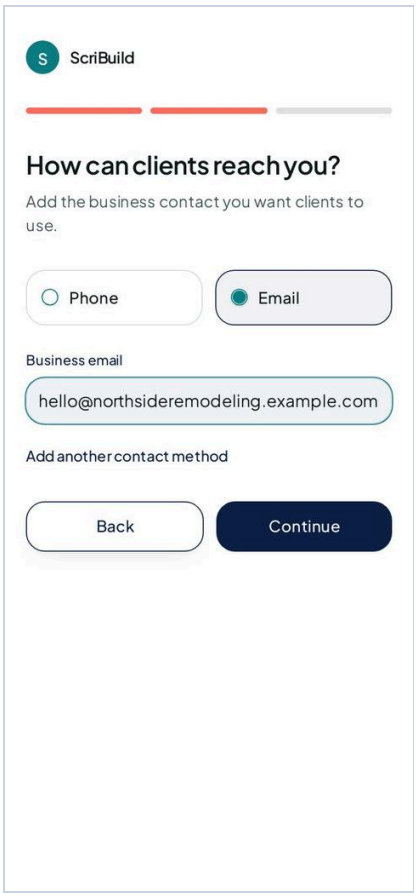

1. **Set up your company**: type your company name and tap **Create company**. Invitations from other companies also appear here.
2. **What kind of work do you do?**: pick your primary trade and tap **Continue**.
3. **How can clients reach you?**: add a business phone or email (you can add more than one).
4. **Where do you work?**: describe your service area, or enter your city and state.
5. **Your workspace is ready**: tap **Open my workspace**. Add your logo and proposal style later in Settings.

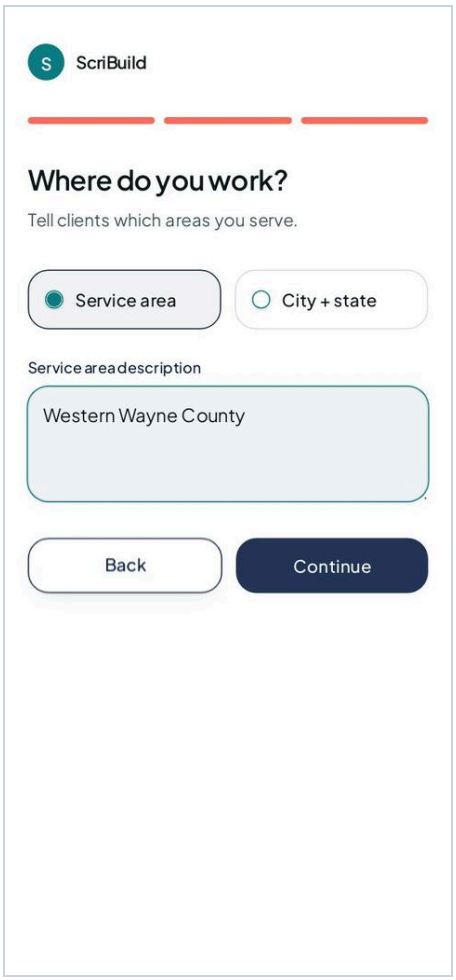

Name your company

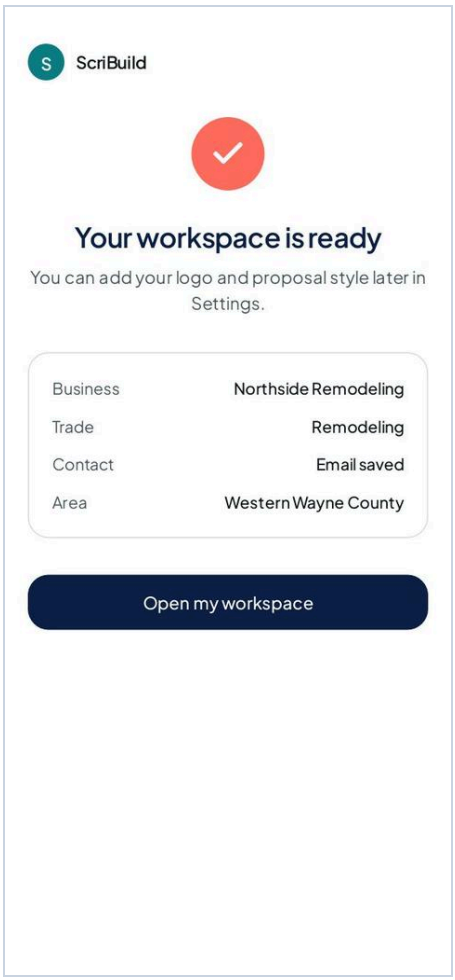

Primary trade

How clients reach you

Service area

Workspace ready

IMPORTANT Keep your company name, trade, a contact method and a service area (or city and state) filled in. If any of them is cleared later, ScriBuild asks you to finish setup again.

1.4 Your Home screen

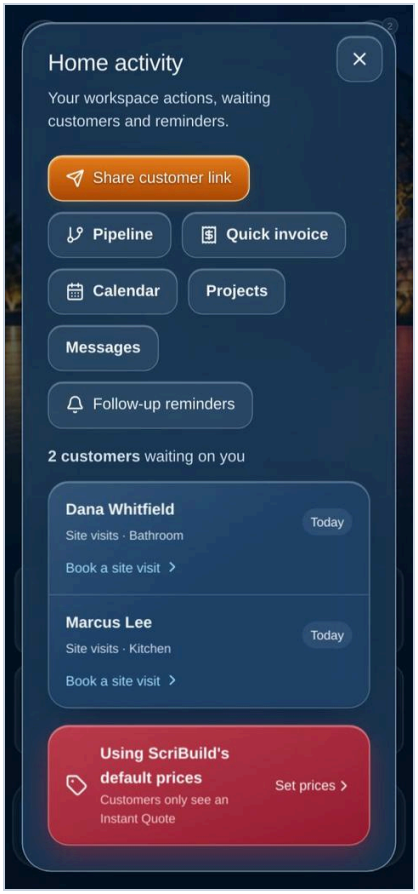

Home is your daily dashboard. Swipe the colored tiles (Jobs, Leads, Proposals, Clients, Estimates, Invoices) to jump to each list. Below them you see:

- **Today's schedule**: today's job visits, proposals and follow-ups. **View All** opens the Calendar.
- **Pipeline**: the total value of priced leads, site visits and proposals.
- **Active jobs**, **Clients** and **Win rate** (accepted ÷ accepted + declined estimates).

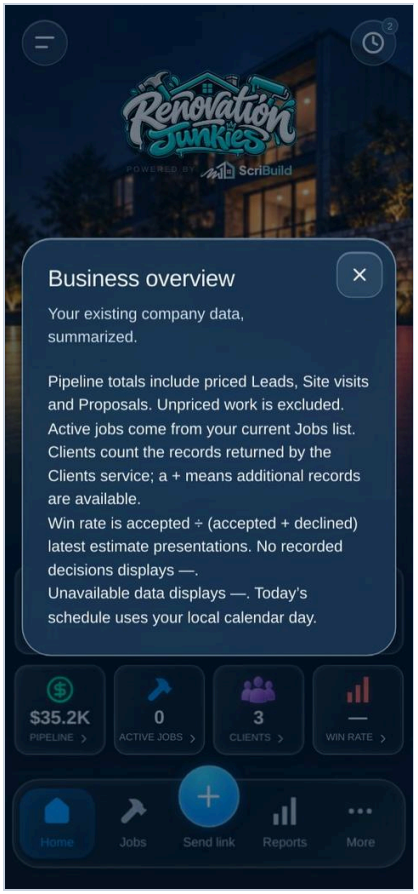

The bottom bar on Home has **Home**, **Jobs**, the orange **Send link** button, **Reports** and **More**. On other pages it shows **Home**, **Send link** and **Messages**.

Home

Home activity (clock icon)

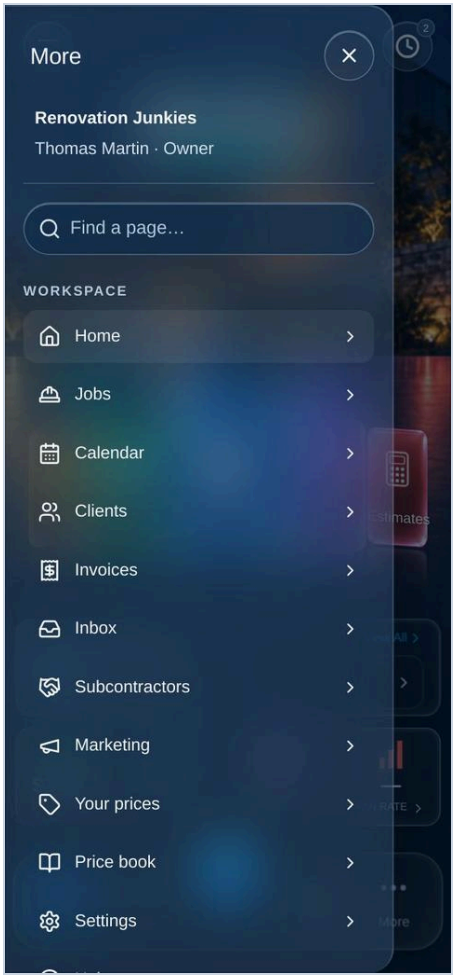

Reports: business overview

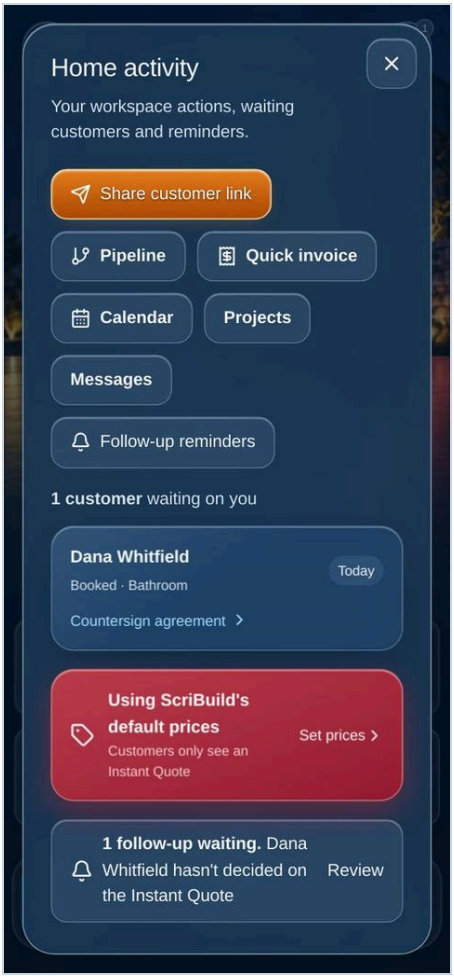

1.5 The menu and Home activity

Tap the menu button (top left) or **More** to reach every page: Home, Jobs, Calendar, Clients, Invoices, Inbox, Subcontractors, Marketing, Your prices, Price book, Settings and Help. **More pages** lists New lead, Leads, Estimates, Quote requests and Instant Quotes. Use **Search pages** to jump anywhere, pick the **Twilight** (dark) or **Day** appearance, or **Sign out**.

The clock icon (top right) opens **Home activity**: shortcuts (Share customer link, Pipeline, Quick invoice, Calendar, Projects, Messages, Follow-up reminders), the customers waiting on you, and setup reminders such as **Set prices**.

Menu: all pages and account

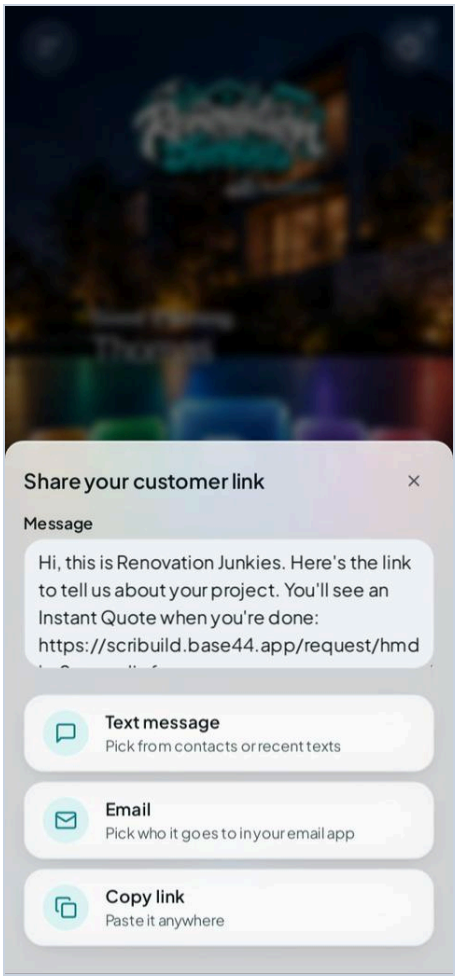

Home activity shows who is waiting on you

2 Getting customer requests

Your customer link is how new projects come in. Share it, print it, post it, and track where leads come from.

2.1 Send your customer link

1. Tap the orange **Send link** button at the bottom of any screen.
2. Edit the **Message** if you like. It already includes your link.
3. Choose **Text message** (opens your phone's Messages), **Email** (opens your email app), or **Copy link** to paste it anywhere.

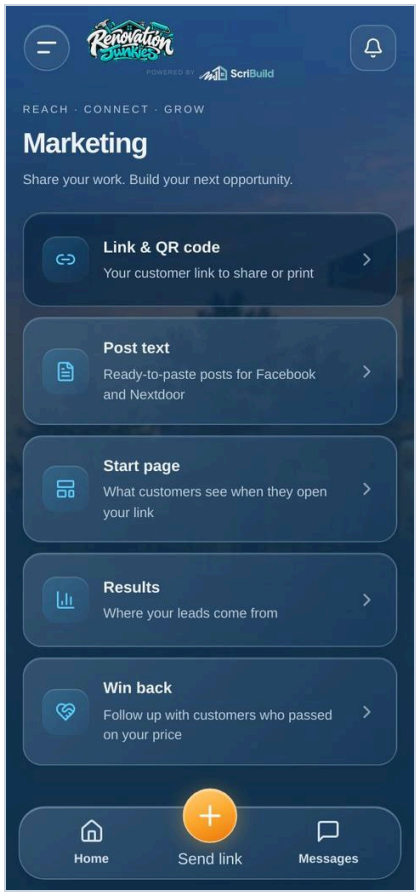

Share your customer link

GOOD TO KNOW ScriBuild never texts or emails customers for you. The message goes out from your own phone or email, so customers recognize who sent it.

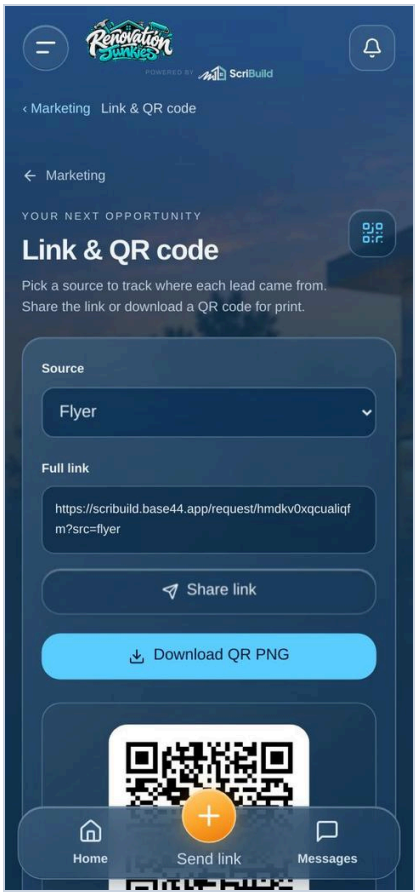

2.2 Marketing: link & QR code, posts, start page, results, win back

Open **Marketing** from the menu (Owners and Admins).

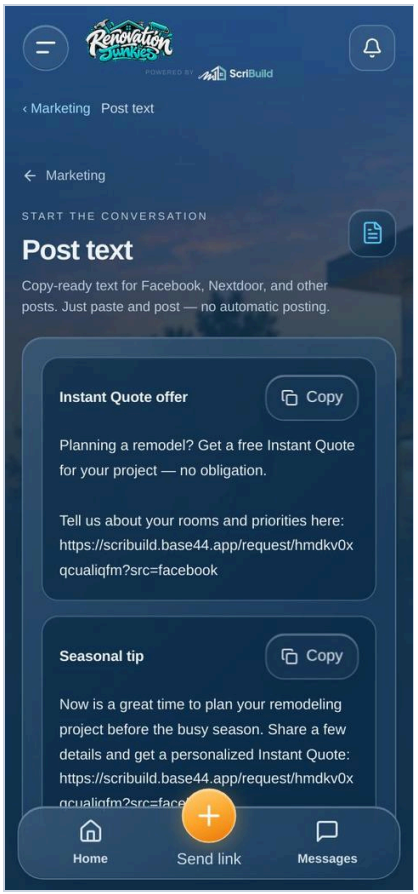

Section	What it does
Link & QR code	Pick a source (Flyer, Yard sign, Truck, Business card, Facebook, Instagram, Google, Nextdoor, Website). ScriBuild adds a tracking tag to the link. Tap Share link or Download QR PNG for print.
Post text	Copy-ready posts (for example an Instant Quote offer and a seasonal tip) with your link already in them. Paste them into Facebook or Nextdoor. Nothing is posted automatically.
Start page	Customize the Headline, Welcome message and Offer phrase customers see first. A phone preview shows the result. Leave blank to keep the default wording.
Results	For each source over the last 90 days: links started, forms submitted and estimates approved.
Win back	Customers who declined their Instant Quote, with the price they saw and their reason. Write a follow-up, send it, and mark it as sent.

Results by source

Win back

2.3 Add a lead yourself

Got a call or a walk-in? Open **New lead** (menu → More pages). Enter the first name, an email or phone, project type, description, desired start and budget range, then tap **Create Lead**.

3 What your customer does with your link

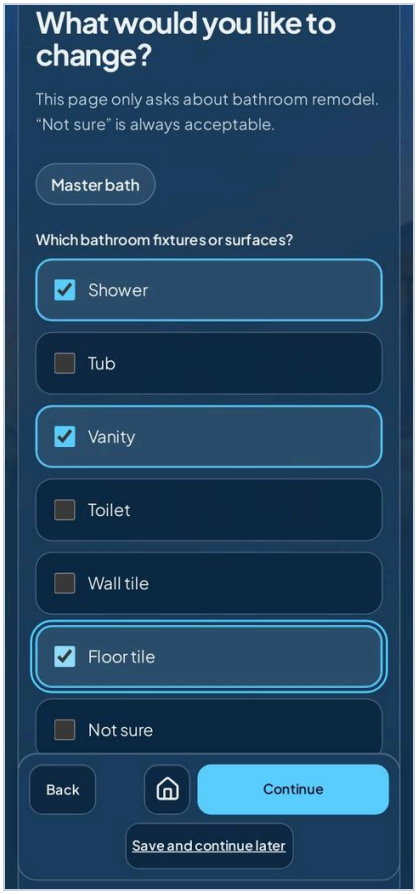

A short tour of the customer request and Instant Quote, so you can guide customers over the phone. The full customer walkthrough is in the separate Customer Guide.

3.1 The customer request, step by step

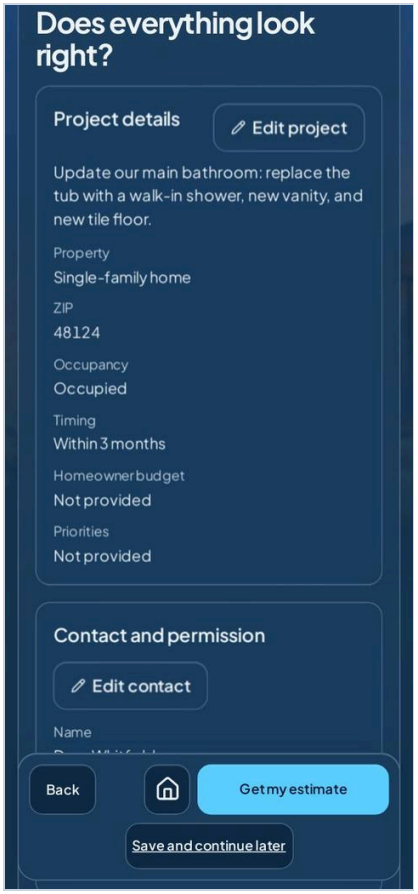

1. The customer opens your link and taps **Get started**.
2. They pick the work types (your standard jobs and your own jobs, such as Install GFCI).
3. They describe the goal, property type, ZIP, occupancy, timing and optional budget.
4. They enter their name, preferred contact method and permission to contact.
5. For each room or area: name it, answer a few questions (for example Replace or Refresh), give rough sizes (or tap a size like Half, Full, Primary), and add up to 8 photos.
6. They check the **Final review** and tap **Get my estimate**.

Pick work types

Questions per room

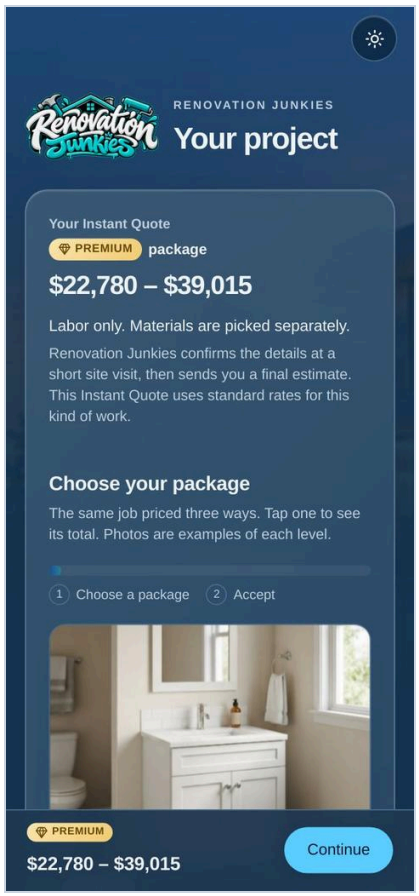

Final review

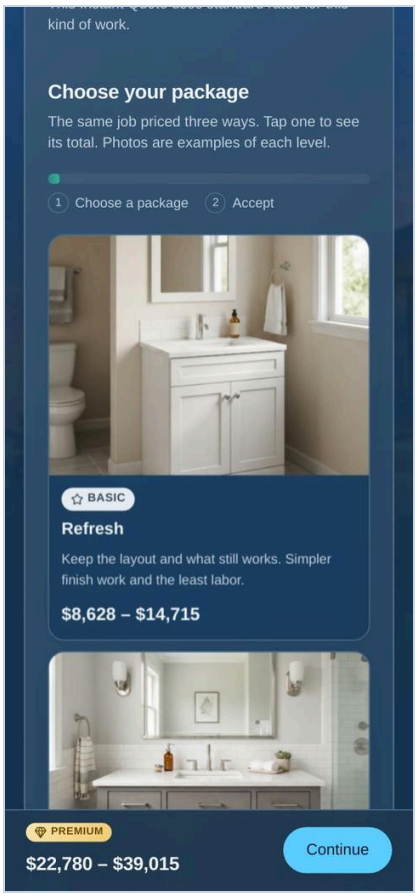

3.2 The Instant Quote and packages

Right after submitting, the customer sees an Instant Quote built from your rates. With Interactive Instant Quote turned on (Settings), they compare three whole-project packages, **Basic** (Refresh), **Standard** (Update) and

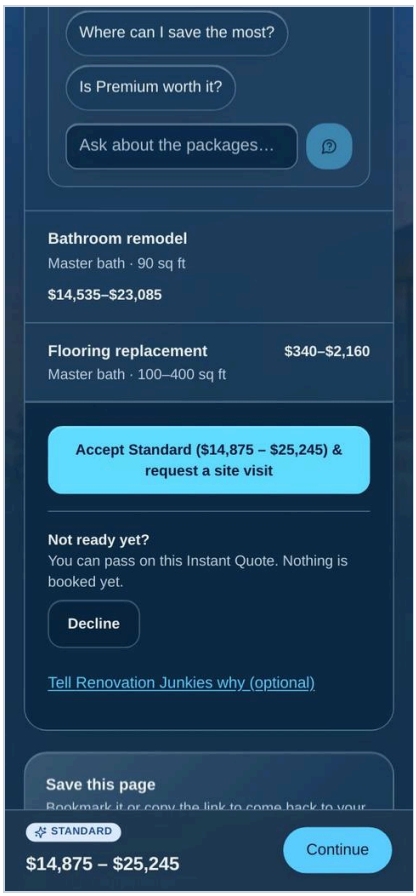

Premium (Full remodel), each with its own total and example photos. ScriBuild marks the package closest to what they described. They can ask the **AI cost advisor**, then accept one package and request a site visit, or decline.

Instant Quote

Three packages

Accept a package

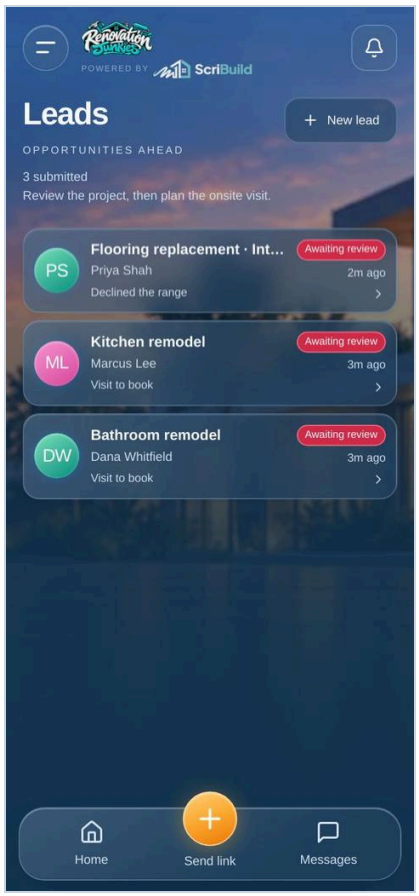

TELL YOUR CUSTOMER Instant Quotes are **labor only**. Materials are picked separately, and the final price is set after your site visit. Customers are told this on screen.

4 Leads, pipeline and the project file

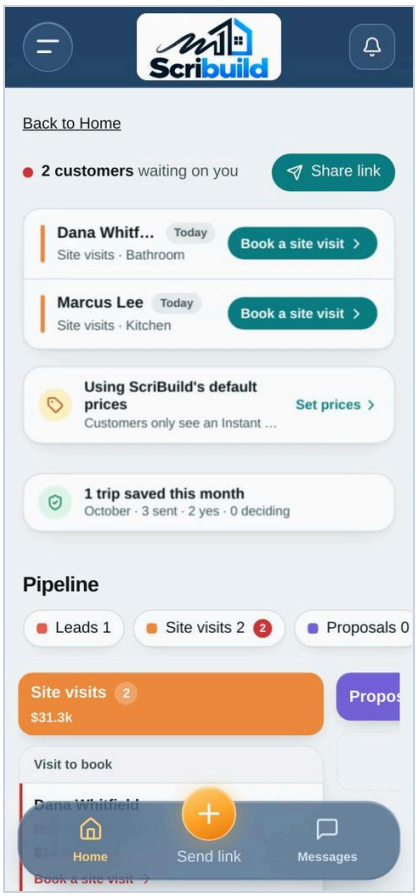

Every request becomes a project file. This is where you review it, contact the customer and move it forward.

4.1 Leads, Pipeline and Clients

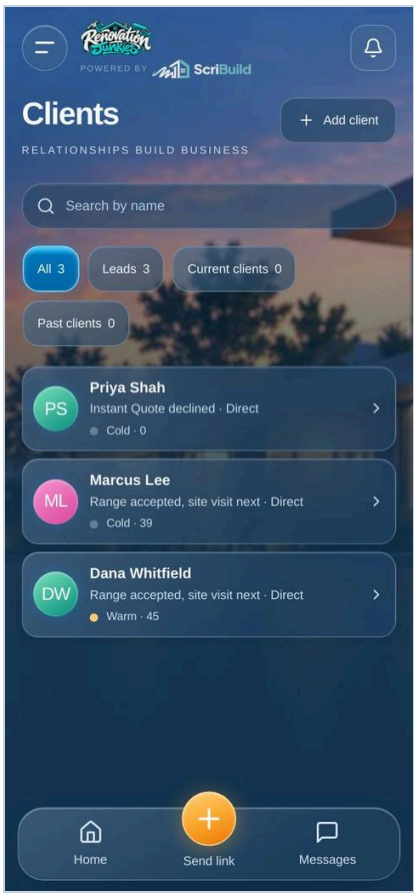

- **Leads**: every submitted request, newest first, with status such as **Awaiting review**.
- **Pipeline** (Home → Pipeline): columns for Leads, Site visits, Proposals, Booked and In progress, with dollar totals. The top shows customers waiting on you, with buttons like **Book a site visit**.
- **Clients**: everyone, filtered by All, Leads, Current clients and Past clients, with the lead score (Cold, Warm) and where they came from.

Leads

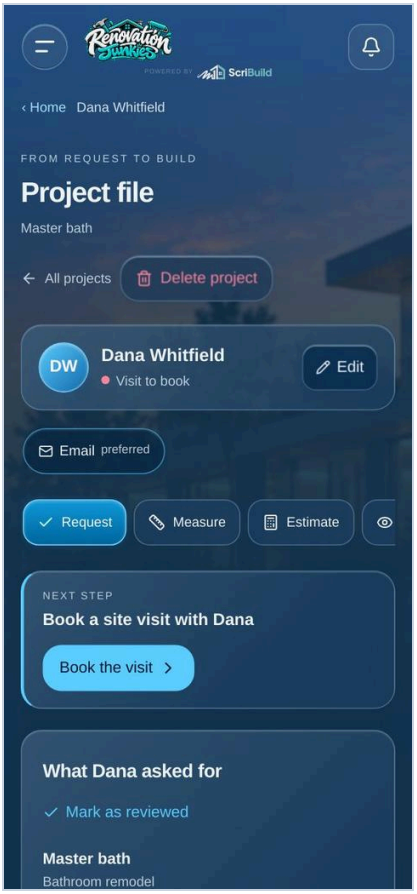

Pipeline

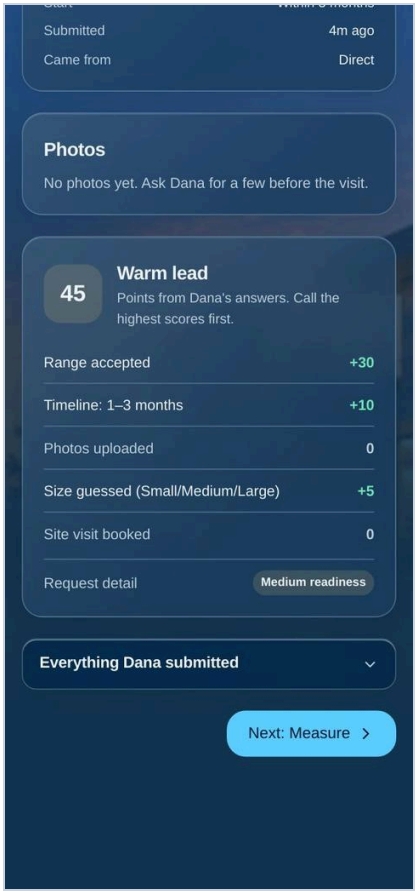

Clients

4.2 Open the project file

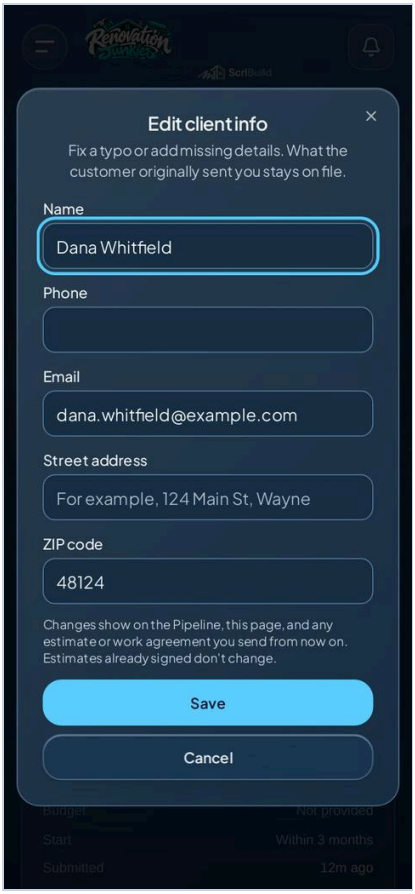

Tap any lead or client to open their **Project file**. The top shows the customer, status and contact buttons (the preferred method is marked). **Edit** fixes their name, phone, email, address or ZIP. The tabs walk you through the job: **Request**, **Measure**, **Estimate**, **Preview**, **Send** (becomes **Schedule** after acceptance), **Messages**, **Rapport**, **Notes** and **Photos**. A **Next step** card always tells you what to do next.

Project file

Lead score

Edit client info

4.3 Lead score: who to call first

Each request gets points from the customer's answers. Call the highest scores first.

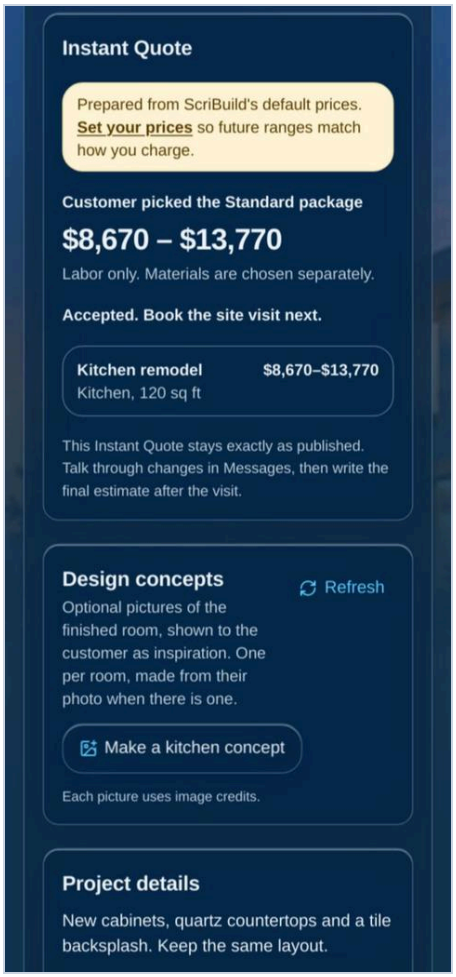

Signal	Points
Range accepted	+30
Site visit booked	+15
Photos uploaded	+10
All sizes measured	+10 (a guessed size, Small/Medium/Large, gives +5)
Timeline	Sooner timelines score higher (for example 1–3 months +10, 3–6 months +4)

4.4 The Instant Quote panel and design concepts

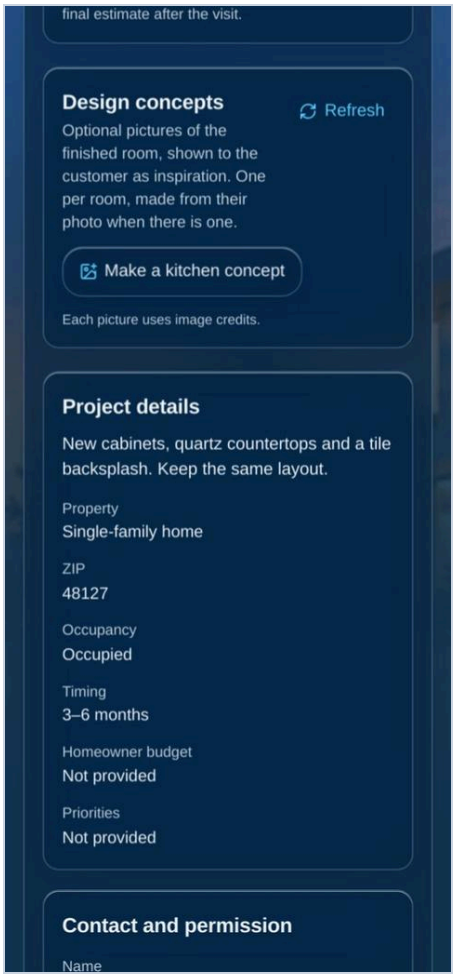

Tap **Everything [customer] submitted** to see their full answers, photos and the **Instant Quote** panel. It shows the range they saw, all three packages, which package the customer picked, and whether they accepted or declined. The Instant Quote stays exactly as published. Talk through changes in Messages, then write the final estimate after the visit.

Design concepts are optional AI pictures of the finished room, made from the customer's photo when there is one, and shown to the customer as inspiration. Each picture uses image credits. ScriBuild only shows a concept

that passes a strict check that it shows the customer’s real room.

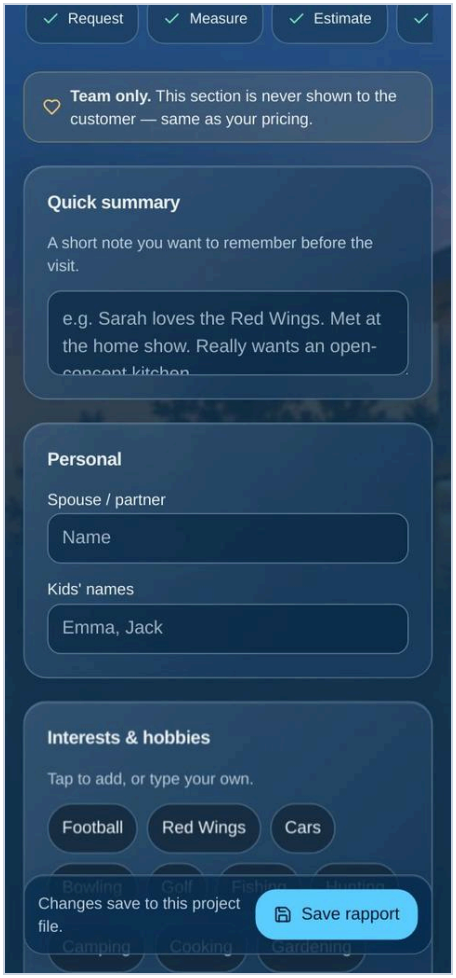

Instant Quote panel: customer picked Standard

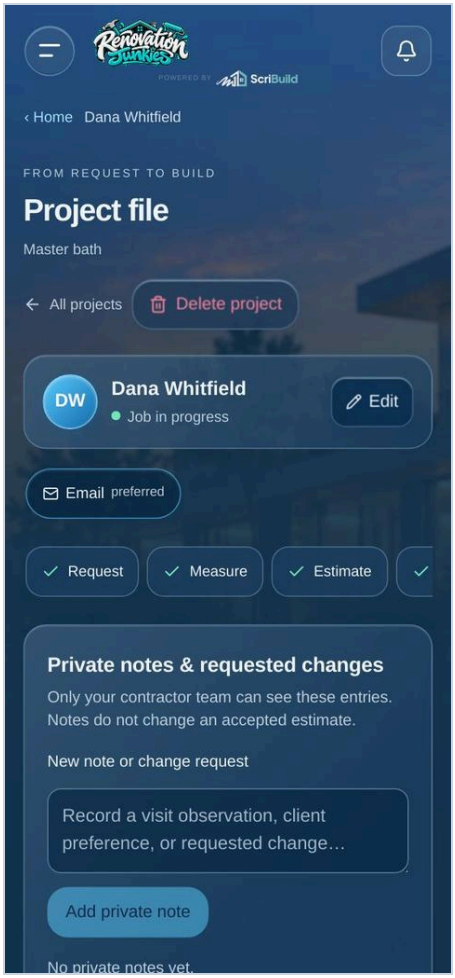

Design concepts (optional)

4.5 Rapport, private notes and photos

- **Rapport** (team only, never shown to the customer): a quick summary, spouse and kids’ names, interests, key dates with reminders, house age, past projects and future wishes, plus jobsite notes such as gate code, parking and pets. Tap **Save rapport**.
- **Notes**: private notes and requested changes. Notes never change an accepted estimate.
- **Photos**: everything the customer uploaded, by room.

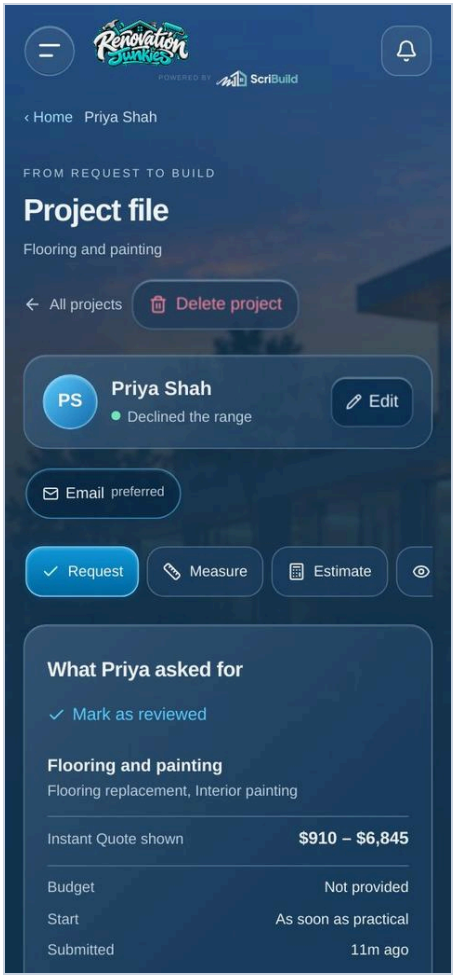

Client rapport

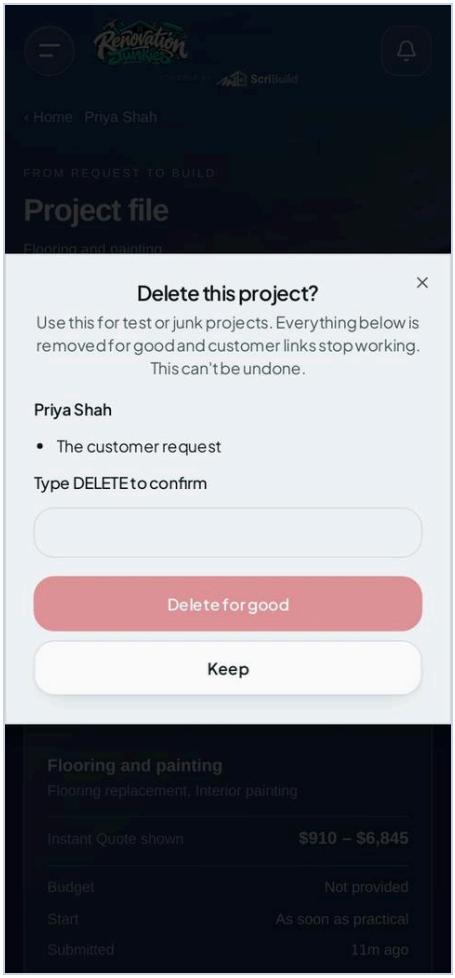

Private notes

4.6 Declined quotes and deleting a project

When a customer declines, the project shows their reason and moves to **Marketing → Win back**. To remove a test or junk project, tap **Delete project**, check what will be removed, type **DELETE** and tap **Delete for good**. Only Owners and Admins can delete, and it can’t be undone.

A declined project

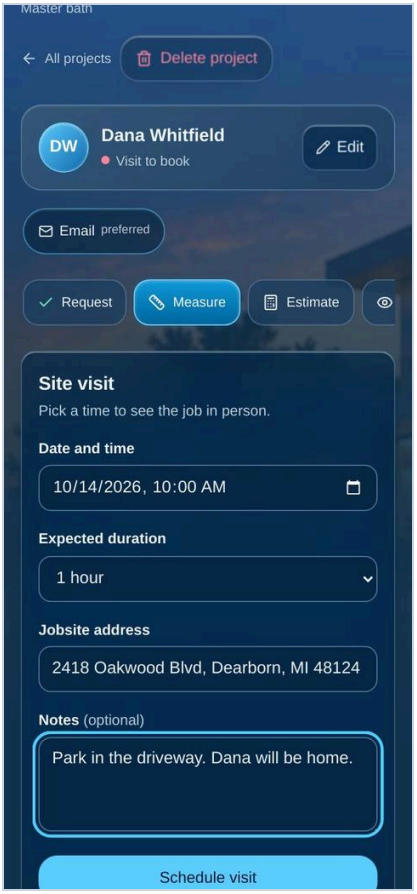

Delete a project

5 Site visit and on-site check

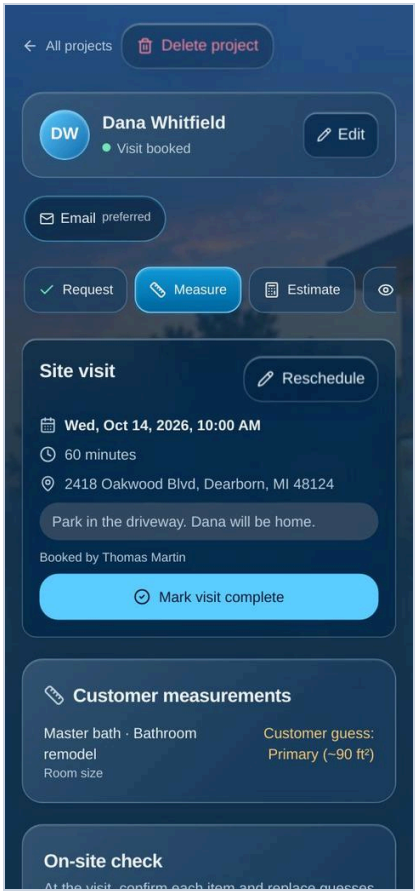

Book the visit, then confirm every item and measurement in person. The final estimate starts from what you confirm here.

5.1 Book the site visit

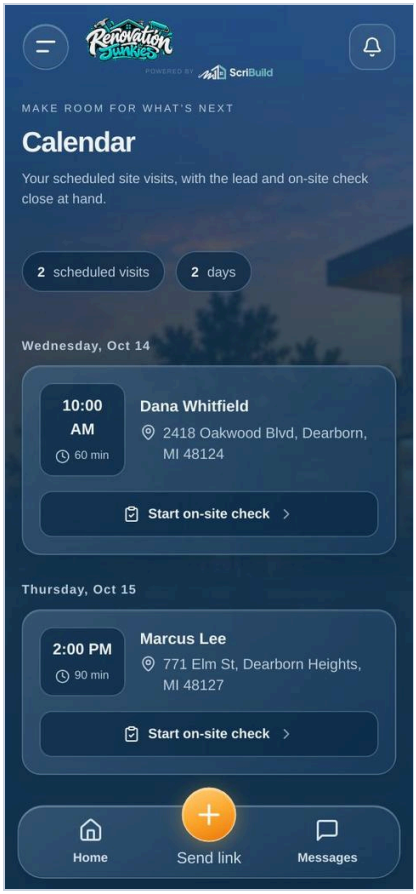

1. In the project file tap **Book the visit** (or **Book a site visit** on Home or Pipeline).
2. Pick the **Date and time** and **Expected duration** (30 minutes to 2 hours).
3. Enter the **Jobsite address** and optional notes (gate code, parking, who will be home).
4. Tap **Schedule visit**. Use **Reschedule** if plans change, or **Mark visit complete** afterwards.

Book the visit

Visit booked

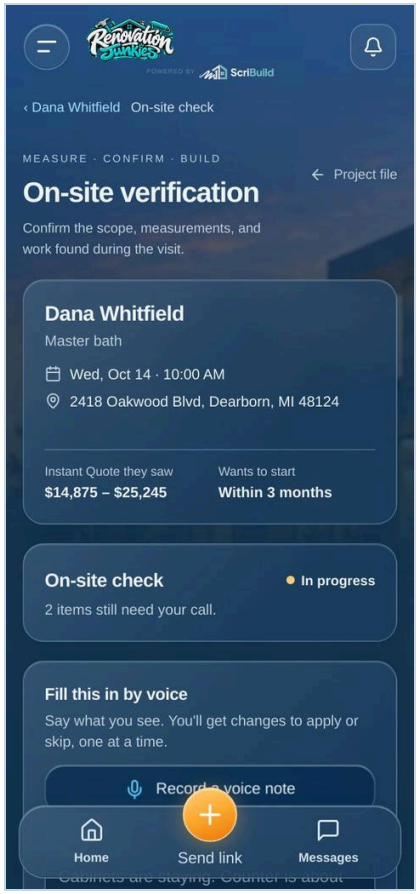

Calendar

TIP The **Calendar** lists every scheduled visit by day, with a **Start on-site check** button on each. The customer sees the visit time on their project page.

5.2 Do the on-site check

1. At the visit tap **Start the on-site check** (project file → Measure tab, or from the Calendar).

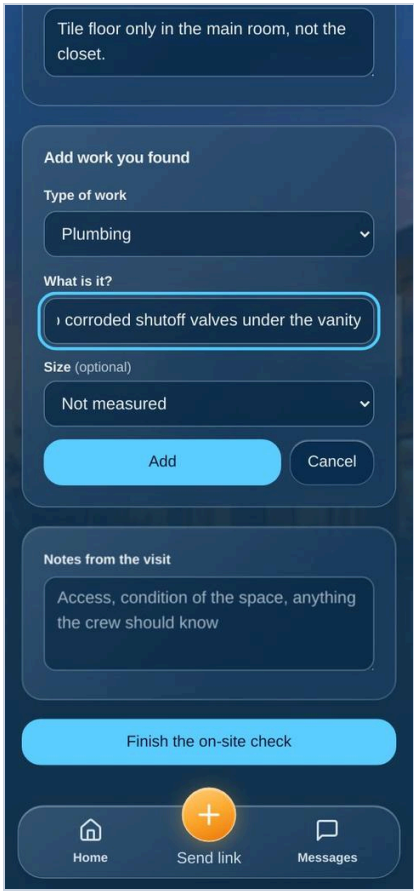

2. For each item the customer asked for, make a call: **Confirmed**, **Modified**, **Not included** or **Needs follow-up**.
3. Under **Measured size** choose **Measured**, **Approximate**, **Not measured** or **Doesn’t apply**, and type the real size. Add notes for the estimate.
4. Found more work? Tap **Add work you found**, pick the type (for example Plumbing), describe it and tap **Add**.
5. Add **Notes from the visit** (access, condition, anything the crew should know).
6. Tap **Finish the on-site check**. You’ll see a summary, then tap **Build Estimate**, or **Save & finish later**.

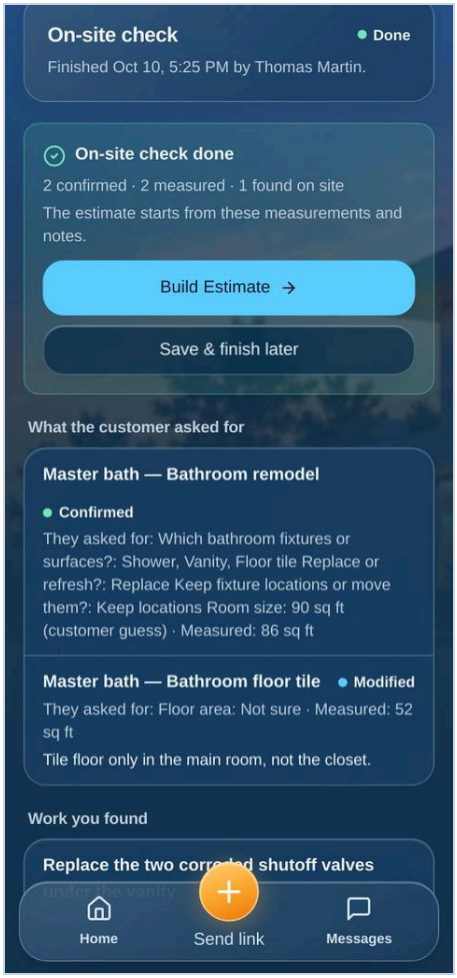

On-site verification

Make a call and measure

Add work you found

On-site check done

> **TIP** **Fill this in by voice**: tap **Record a voice note** (or type it), for example “Cabinets are staying. Counter is about 42 square feet.” ScriBuild turns it into suggested changes that you apply or skip, one at a time.

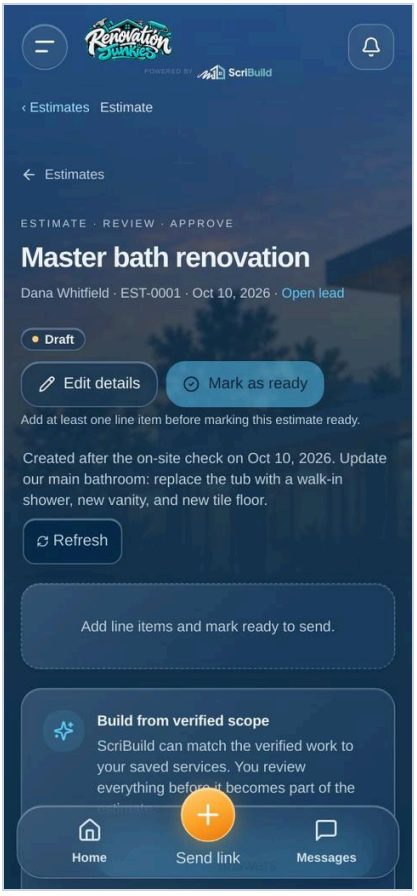

6 Final estimate and work agreement

Turn what you confirmed on site into a priced estimate, preview it as the customer will see it, and send it with the work agreement.

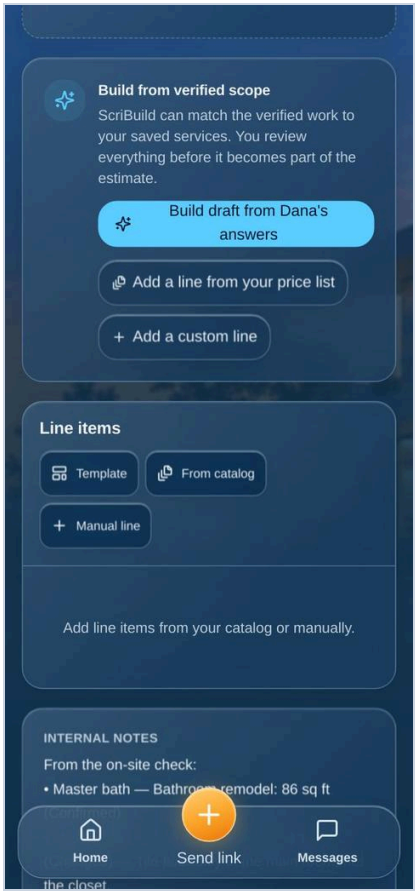

6.1 Start the estimate

Build Estimate creates a draft (for example EST-0001) with your on-site notes copied into **Internal notes**. You have three ways to add lines:

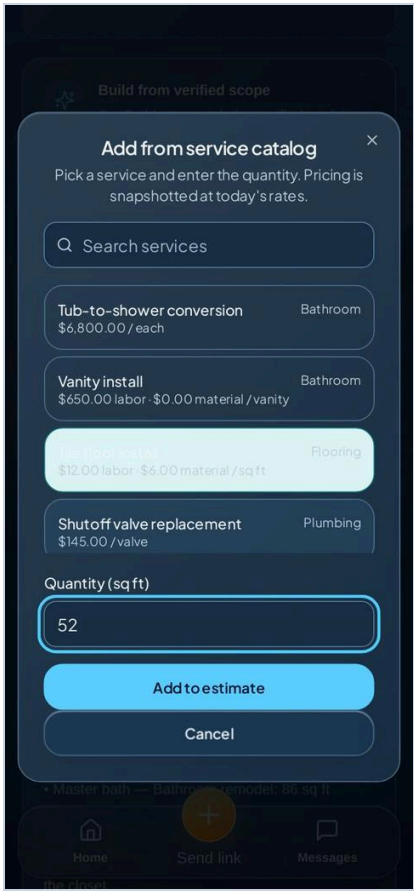

- **Build draft from [customer]'s answers**: ScriBuild matches the verified work to your saved Price book services. You review every suggestion before it becomes part of the estimate.
- **Add a line from your price list** / **From catalog**: pick a saved service and enter the quantity. Pricing is snapshotted at today's rates.
- **Add a custom line** / **Manual line**: type anything, with **Help me price this** if you need a price. **Template** applies a saved project template.

New draft estimate

Ways to add lines

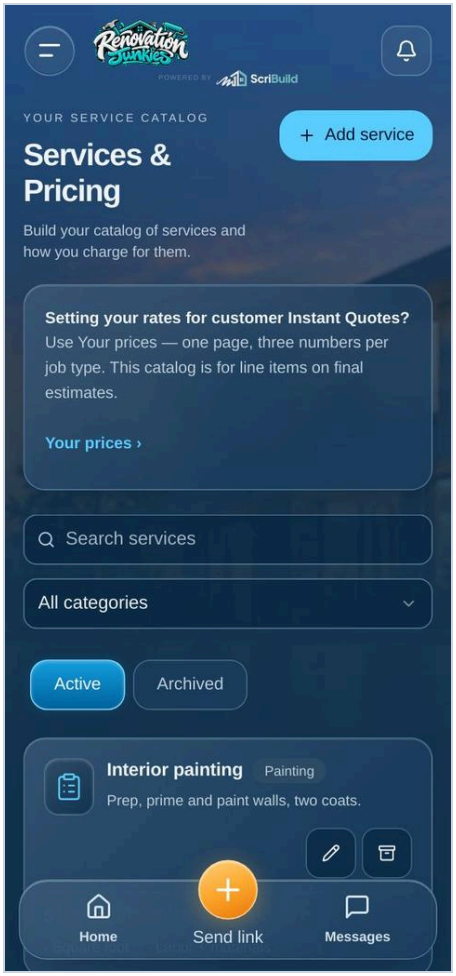

Add from your catalog

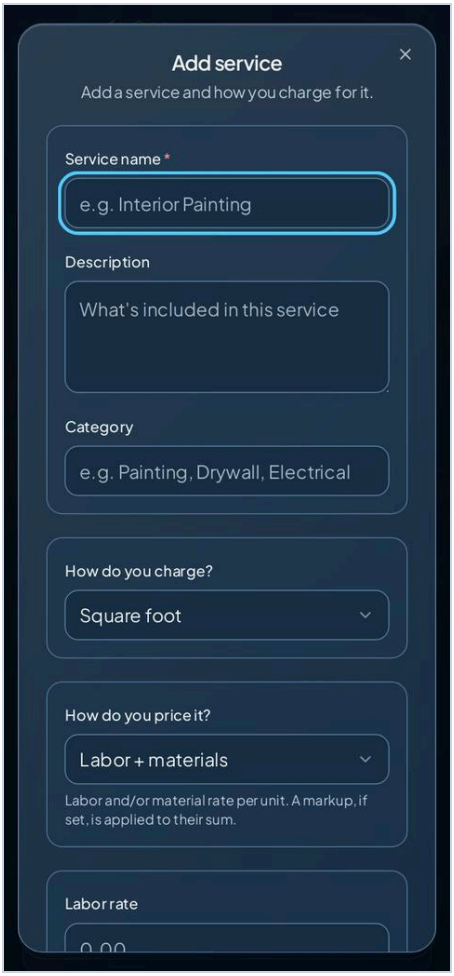

6.2 Your Price book (services)

The **Price book** (menu → Price book) holds the services you use on final estimates. Tap **Add service** and enter the name, description, category, how you charge (**Square foot**, **Linear foot**, **Per unit**, **Hourly** or **Fixed price**)

and how you price it: **Labor + materials** (labor and material rate, optional markup and minimum charge) or **All-in price**.

Services & Pricing

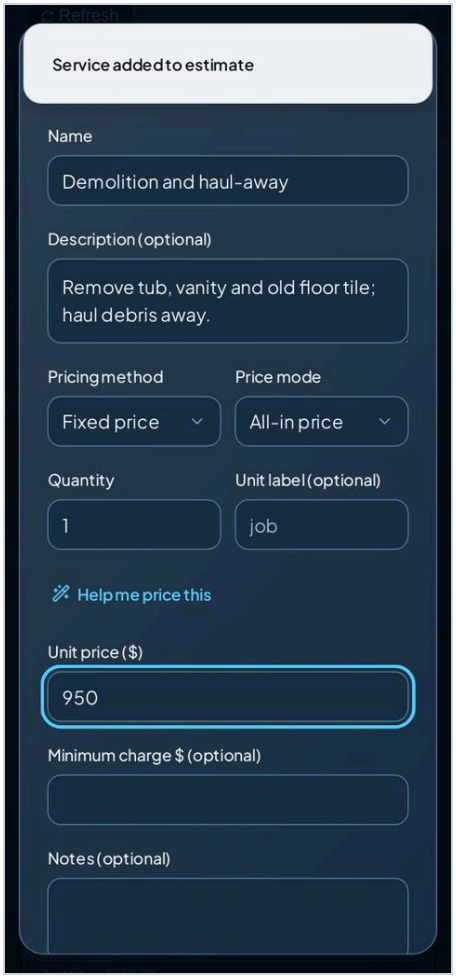

Add service

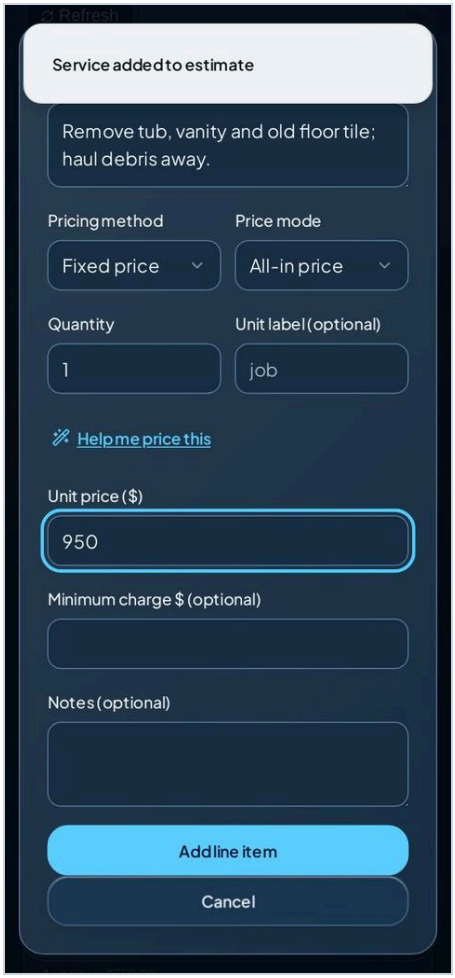

> **GOOD TO KNOW** Your Price book is for final estimates. Customer Instant Quotes use **Your prices** (Chapter 10), one page with three numbers per job type.

6.3 Custom lines and “Help me price this”

For one-off work, tap **Manual line**. Enter a name and description, pricing method and mode, quantity, unit and unit price, plus optional minimum charge and notes, then tap **Add line item**. Not sure what to charge? Tap **Help me price this**. The pricing wizard is explained step by step in Chapter 9.

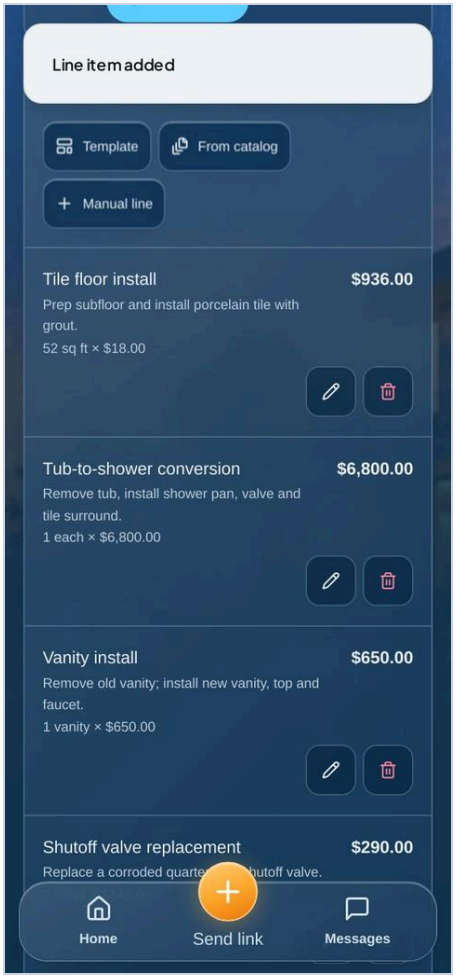

Manual line

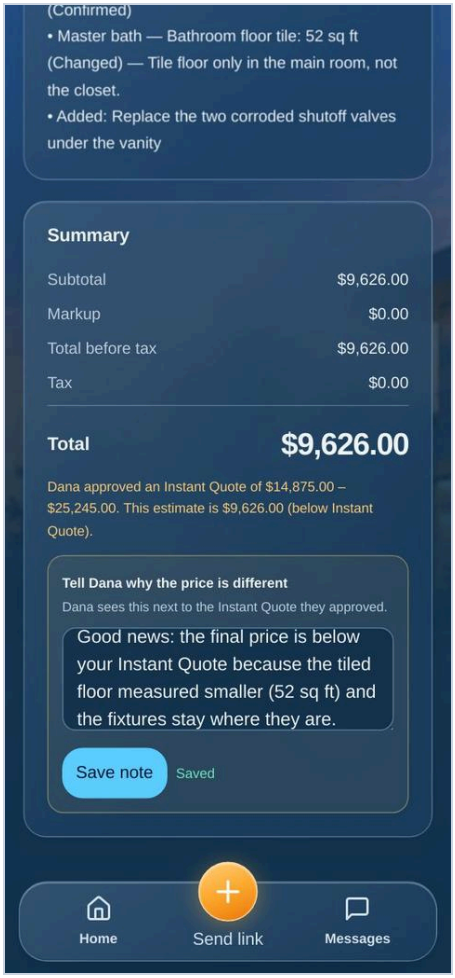

Help me price this, under the unit price

6.4 Review lines, totals and explain any price change

Each line shows quantity × price, with edit and remove buttons. The **Summary** shows subtotal, markup, tax and total. ScriBuild compares the total with the Instant Quote the customer approved. If it's different, write a short reason in **Tell [customer] why the price is different** and tap **Save note**. The customer sees it right next to the Instant Quote.

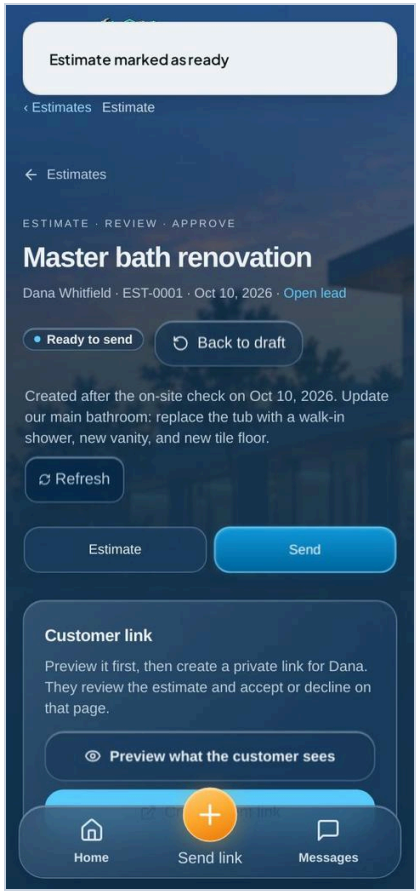

Line items

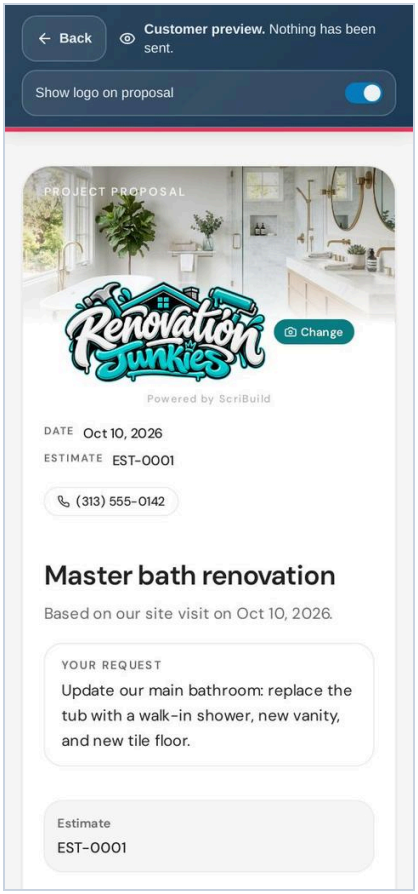

Summary and the price-change note

6.5 Mark ready and preview

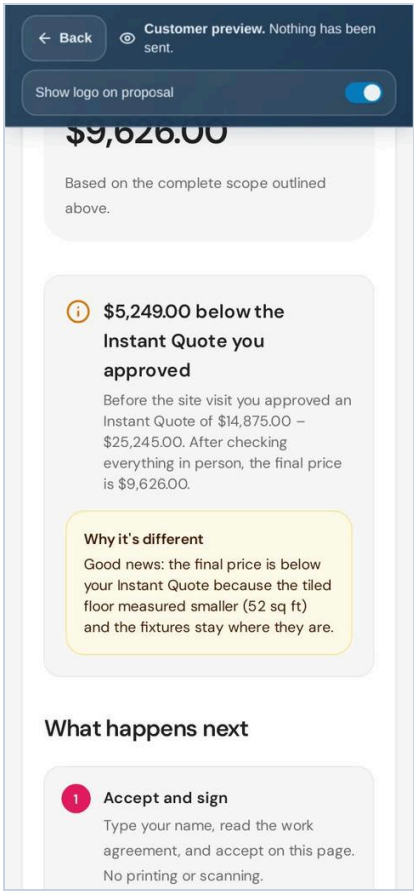

1. Tap **Mark as ready** (you need at least one line). **Back to draft** lets you keep editing.
2. Tap **Preview what the customer sees**. Nothing is sent. Turn **Show logo on proposal** on or off, and use **Change** to switch the proposal style.

Ready to send

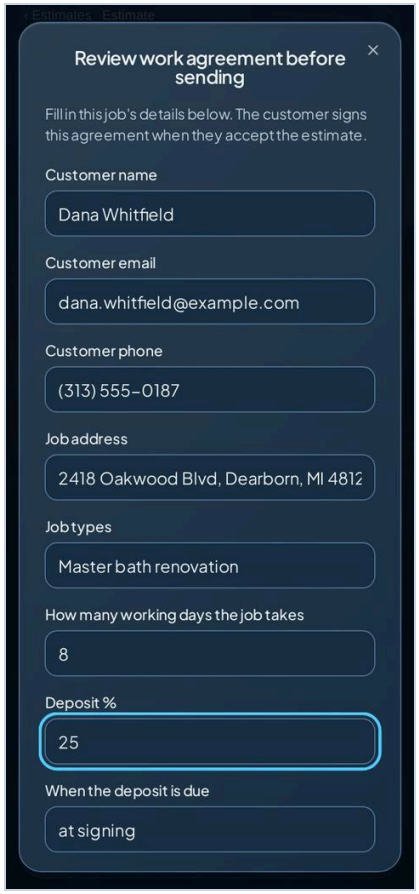

Customer preview

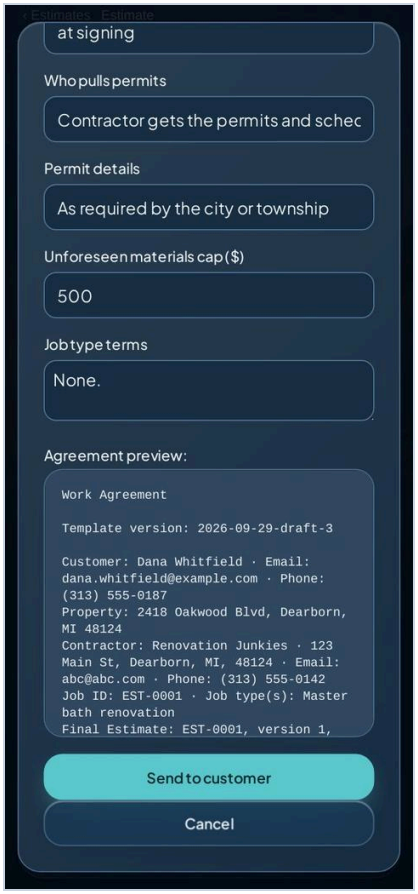

Total vs. Instant Quote

6.6 Review the work agreement and send

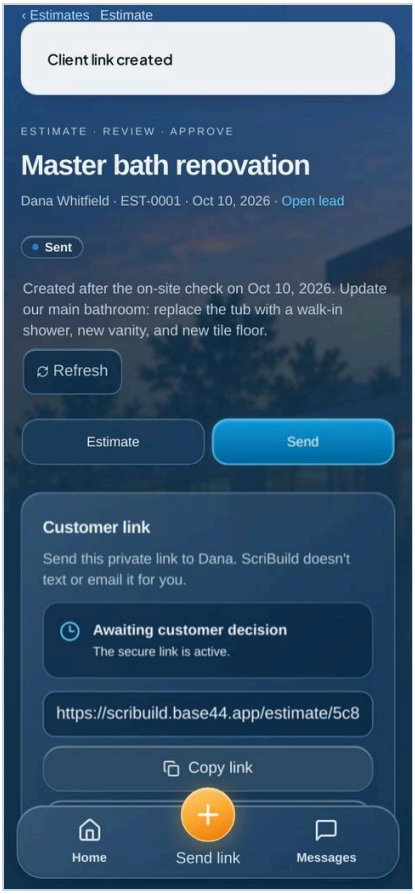

1. Tap **Create client link**. The **Review work agreement before sending** panel opens.
2. Add your company details once if asked (for example your business address in Settings).
3. Fill in this job: working days, customer name, email, phone, job address, job types, deposit % and when it’s due, who pulls permits, permit details, unforeseen materials cap and job-type terms. The agreement preview updates as you type.
4. Tap **Send to customer**. Then **Copy link** and text or email it to the customer. ScriBuild doesn’t text or email it for you.

Work agreement details

Agreement preview

Link created, waiting on customer

GOOD TO KNOW The agreement includes the Final Estimate as Attachment A, the price and payment schedule, the Notice of Cancellation, and a lead-safe pamphlet acknowledgment (homes built before 1978). The Instant Quote, concept pictures and photos are not part of the contract.

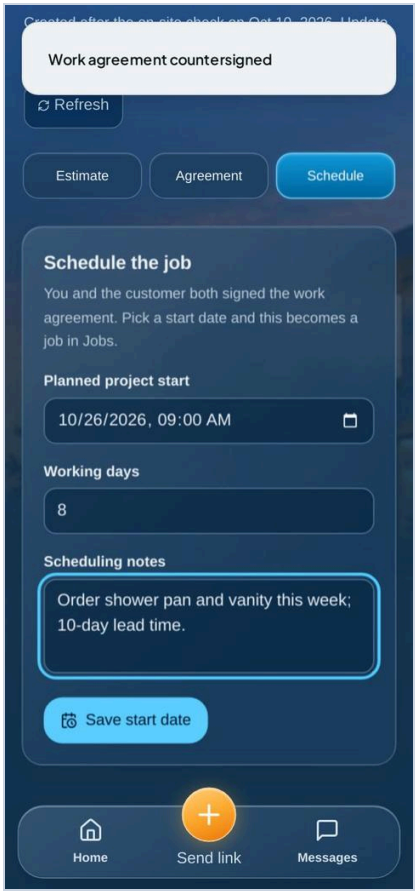

6.7 Countersign and set the start date

When the customer accepts and signs, Home activity shows **Countersign agreement** and a follow-up reminder appears.

1. Open the estimate and tap the **Agreement** tab. Type your full name and tap **Countersign agreement**.
2. Open the **Schedule** tab. Pick the **Planned project start**, confirm **Working days**, and add scheduling notes (permits, lead times, access).
3. Tap **Save start date**. The project becomes a Job (for example JOB-0001). Tap **Open job**.

Customer accepted, countersign

Schedule the job

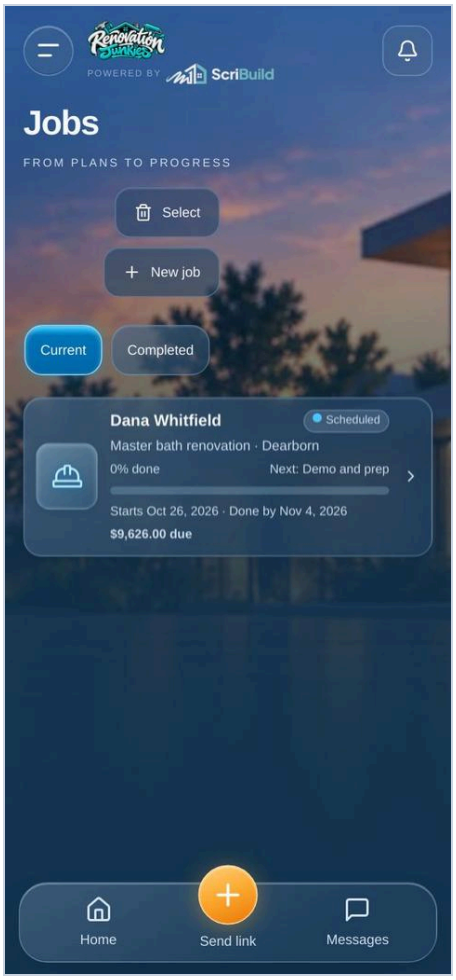

Scheduled, now a Job

7 Running the job

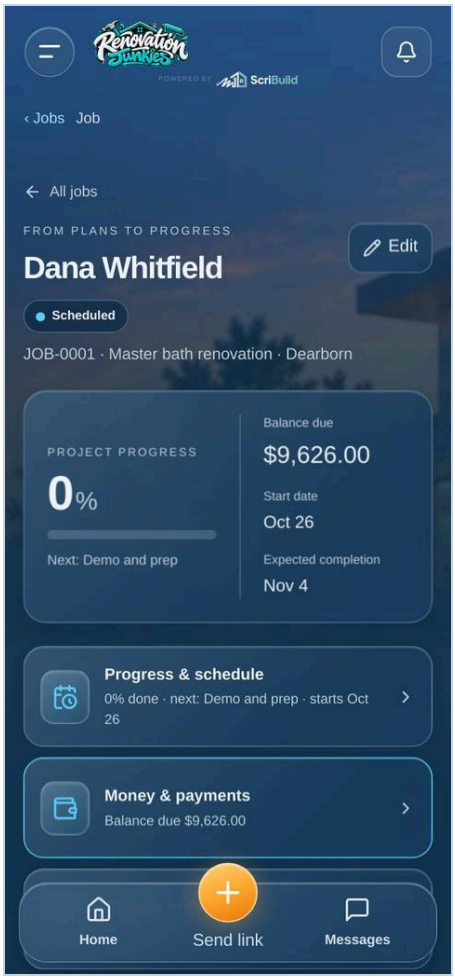

Everything for a signed project lives on the Job: progress, money, change orders, materials, updates and exports.

7.1 Jobs list and job overview

Jobs has **Current** and **Completed** tabs. Each card shows status, percent done, the next phase, dates and balance due. Open a job to see its overview and seven sections.

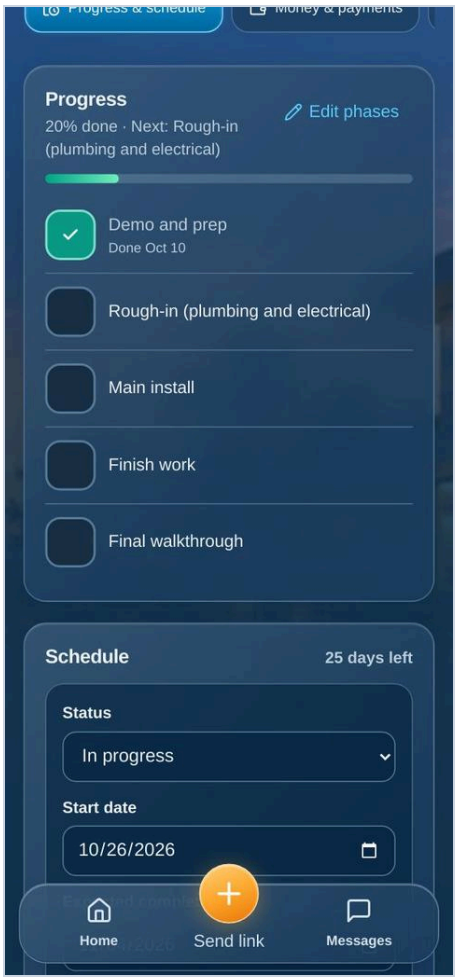

Jobs

Job overview

7.2 Progress & schedule

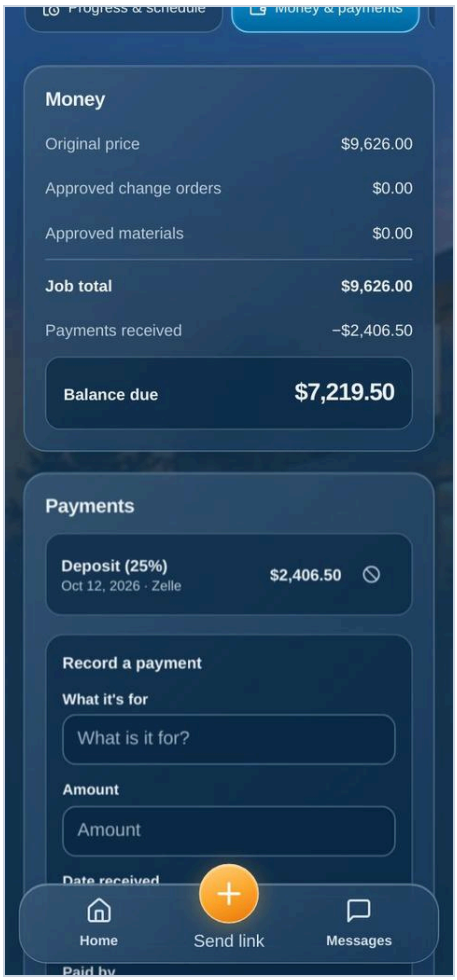

Tick **Mark complete** on each phase as you go. The default phases are Demo and prep; Rough-in (plumbing and electrical); Main install; Finish work; Final walkthrough. **Edit phases** changes them. Set the status (**Scheduled**, **In progress**, **On hold**, **Complete**), the start date and the expected completion date, then tap **Save schedule**.

Progress & schedule

7.3 Money & payments

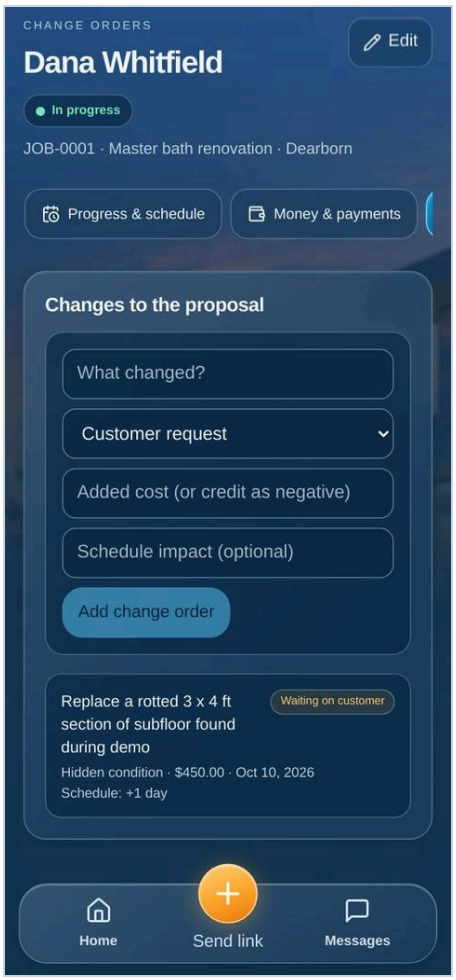

See the original price, approved change orders and materials, the job total, payments received and the balance due. To **Record a payment**, enter what it's for, the amount, the date received and how they paid (Check, Card, Cash, Zelle or Financing), then tap **Record payment**. The customer sees payments in their account.

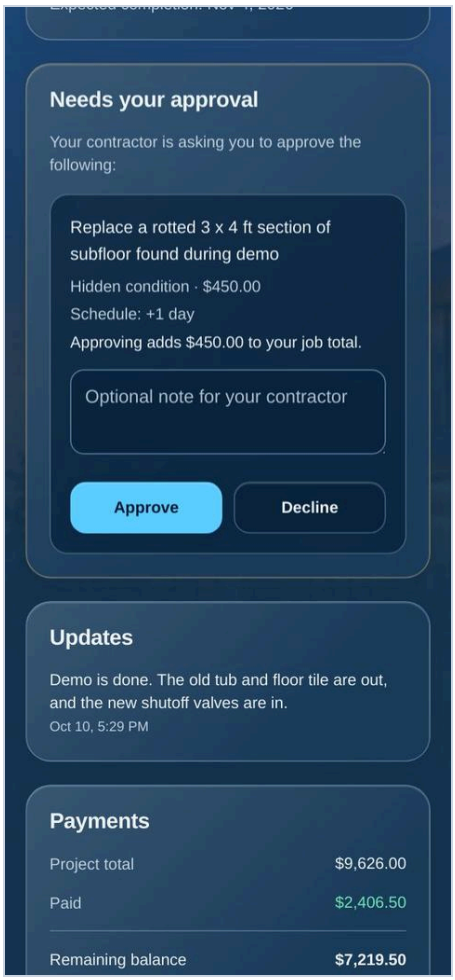

Money & payments

7.4 Change orders

Enter **What changed?**, the reason (**Customer request** or **Hidden condition**), the added cost (enter a negative number for a credit) and any schedule impact. Tap **Add change order**. It shows **Waiting on customer** until they approve or decline it from their account. Approved amounts are added to the job total.

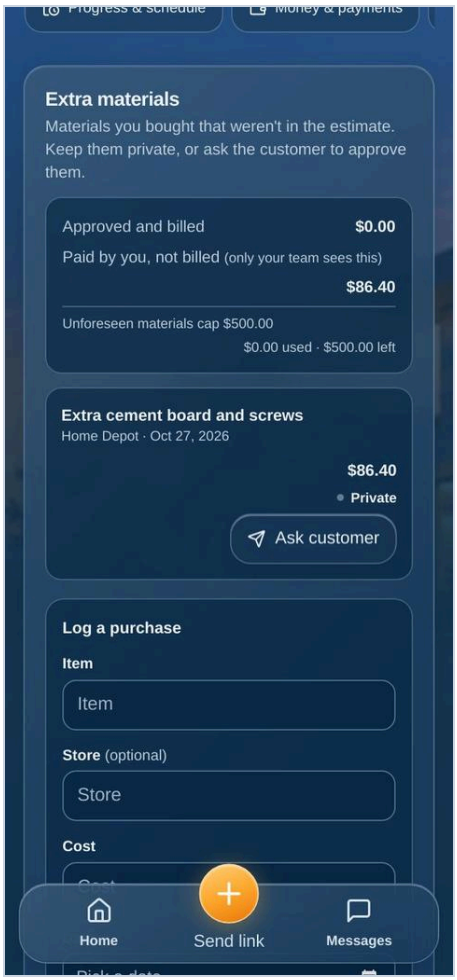

Change order waiting on the customer

What the customer sees

7.5 Materials

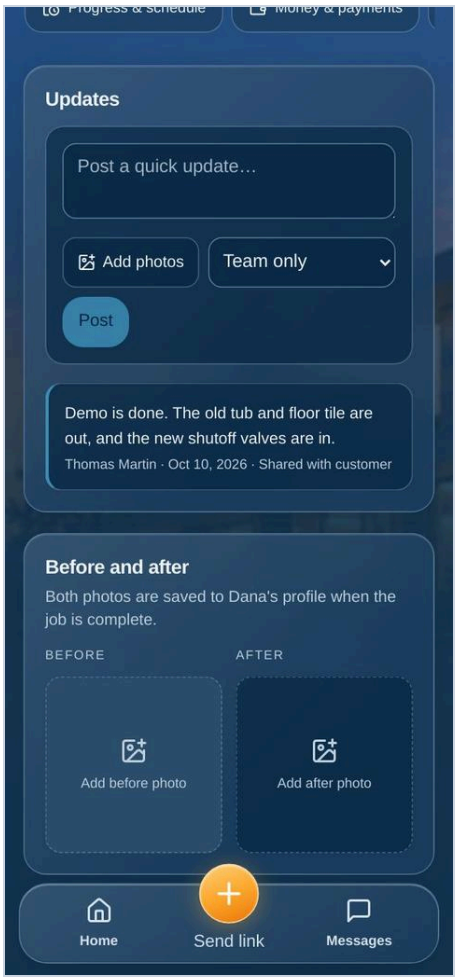

Log a purchase for materials you bought that weren't in the estimate: item, store, cost, date and a receipt photo. Each entry is **Private** (paid by you, only your team sees it) until you tap **Ask customer** to have them approve it and add it to the bill. The **Unforeseen materials cap** from the agreement shows how much is used and how much is left.

Materials

7.6 Updates & photos

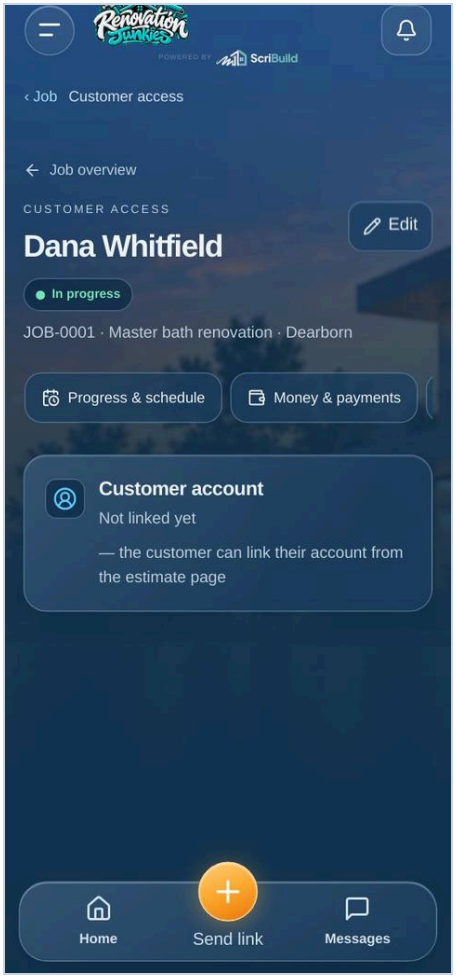

Post a quick update with photos. Choose **Team only** or **Share with customer**, then tap **Post**. Add a **Before** and an **After** photo. Both are saved to the customer's profile when the job is complete.

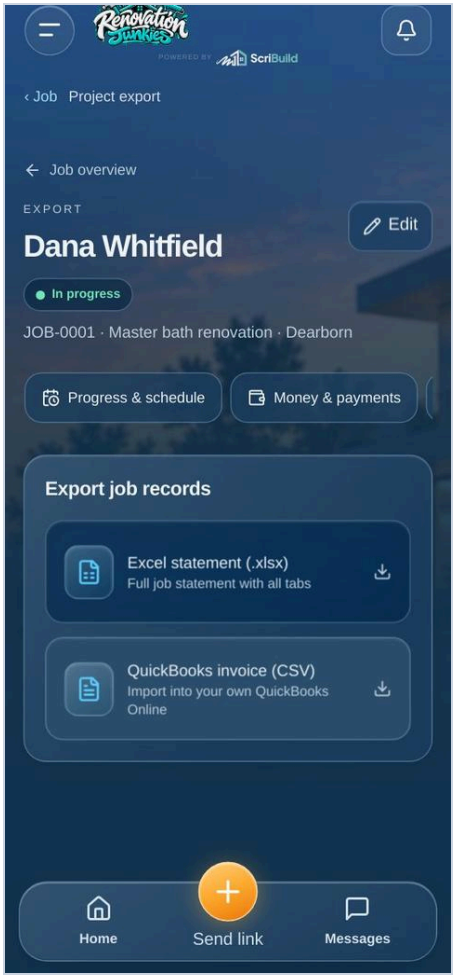

Updates & photos

7.7 Customer access and export

- **Customer access** shows whether the customer has linked a ScriBuild account. They link it from their estimate page after signing.
- **Export**: download an **Excel statement (.xlsx)** with all job tabs, or a **QuickBooks invoice (CSV)** to import into your own QuickBooks Online.

Customer access

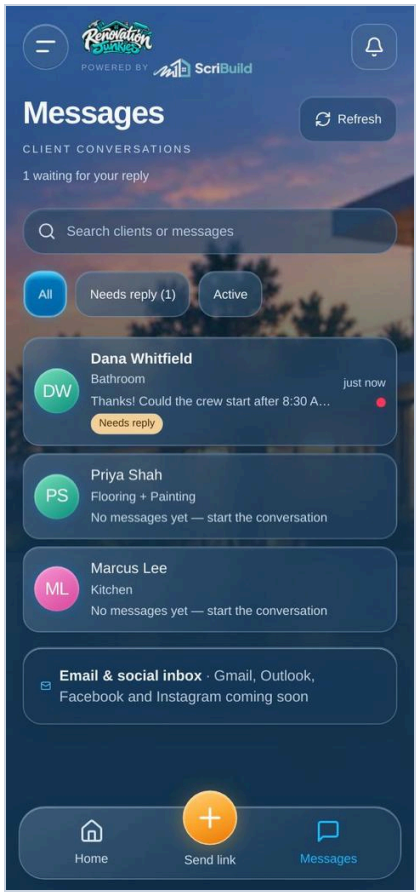

Export job records

8 Messages

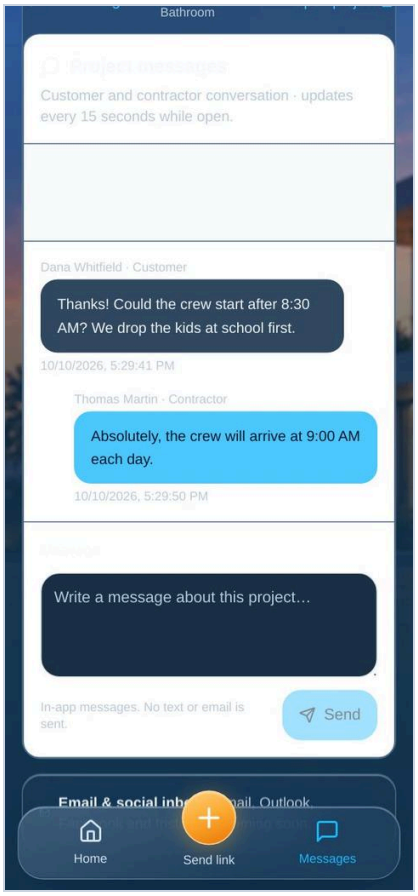

Talk with customers inside the app, per project.

8.1 Client messages

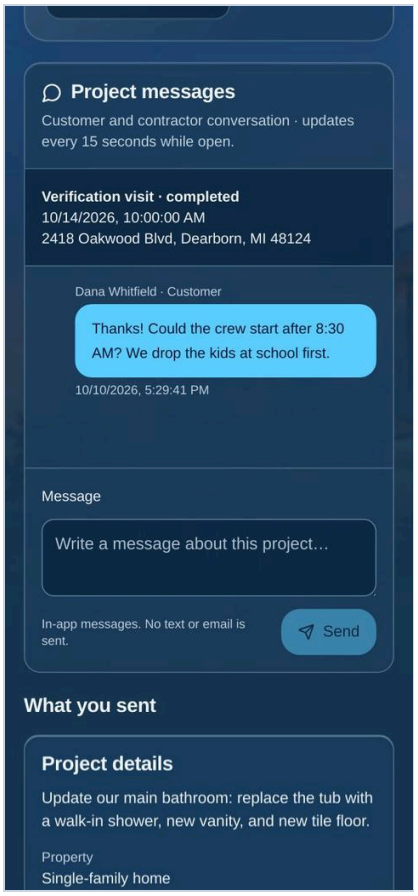

Tap **Messages** on the bottom bar. Every project has a conversation. Customers whose last message is waiting on you are bold and tagged **Needs reply**, and the header counts them. Filter by **All**, **Needs reply** or **Active**, or search. Tap a client to read and reply. **Open project** jumps to their project file. Projects without messages say “No messages yet — start the conversation”.

Client conversations

Conversation

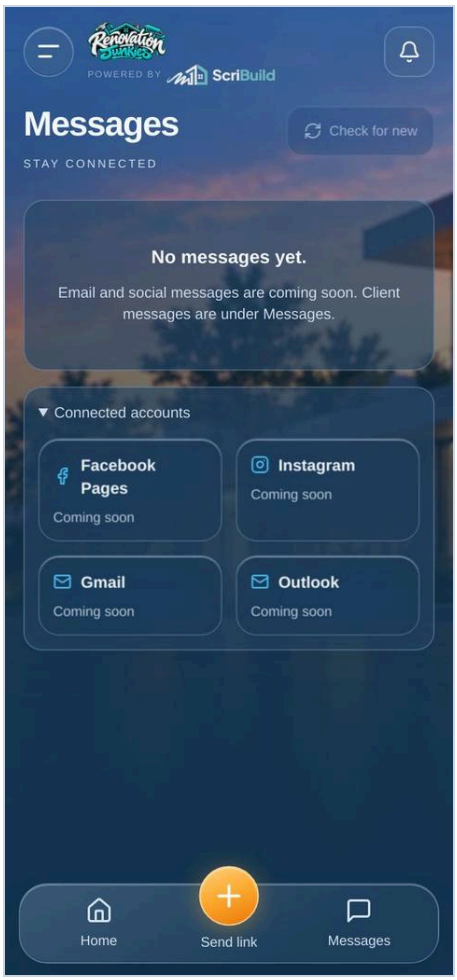

The customer’s side

TELL YOUR CUSTOMER These are in-app messages. The customer reads and replies on their project page (it refreshes every 15 seconds while open). No text or email is sent, so tell customers to bookmark their project link.

8.2 Email & social inbox (coming soon)

The **Inbox** page will bring Gmail, Outlook, Facebook Pages and Instagram messages into ScriBuild. The cards show **Coming soon** until those connections are set up for your account.

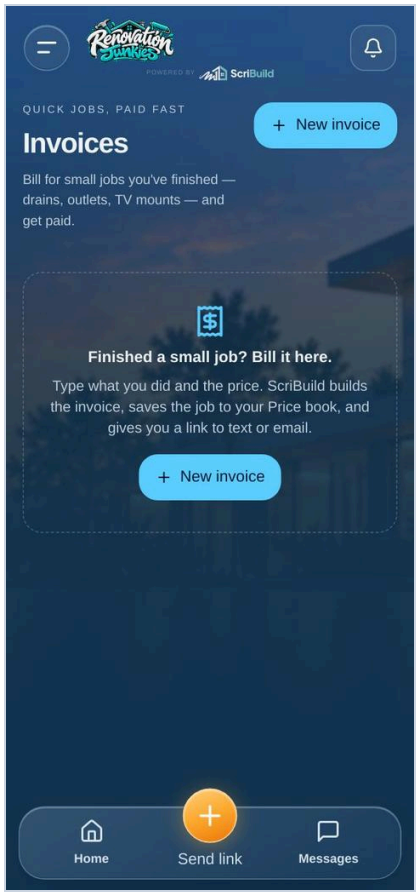

Email & social inbox

9 Quick invoices and the pricing wizard

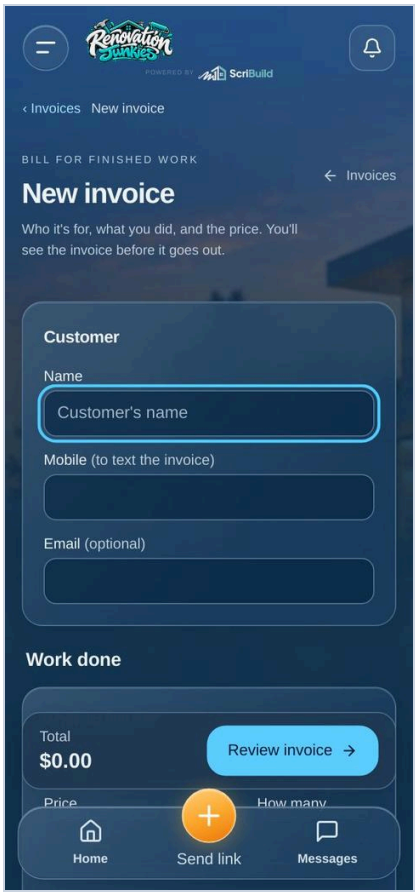

Bill small jobs you've finished, like drains, outlets and TV mounts, and get help pricing work you don't do often.

9.1 Create a quick invoice

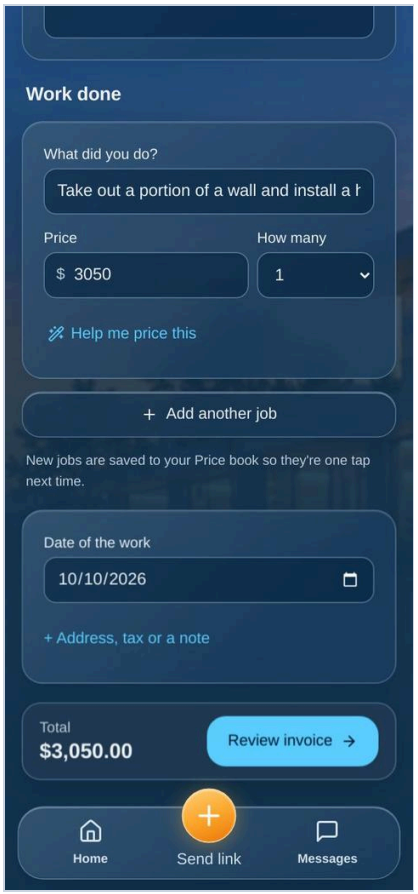

1. Open **Invoices** and tap **New invoice**.
2. Enter the customer's **Name**, **Mobile** (to text the invoice) and optional email.
3. Under **Work done**, type what you did, the price and how many. **Add another job** adds more lines. New jobs are saved to your Price book so they're one tap next time.
4. Set the date of the work, and use **+ Address, tax or a note** if needed.
5. Tap **Review invoice**.

Invoices

New invoice

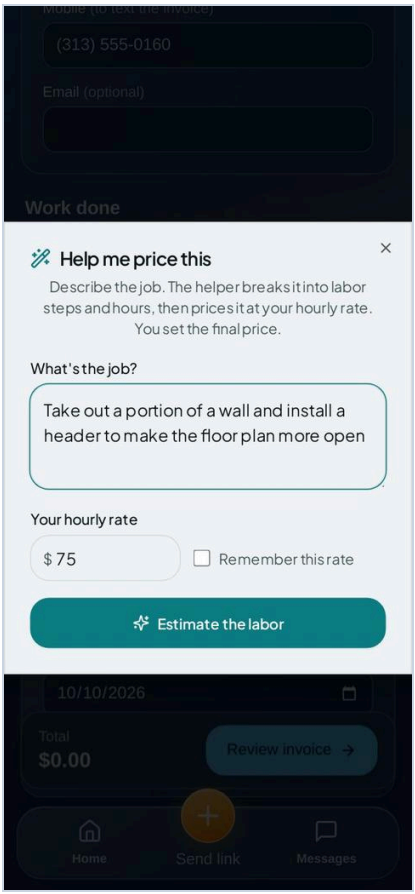

Work done and total

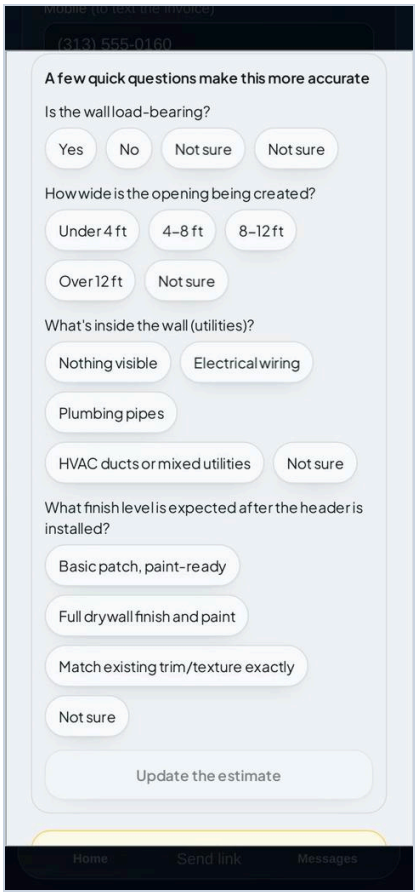

9.2 "Help me price this": the pricing wizard

Use it when you don't know what to charge, for example taking out part of a wall and installing a header. The AI estimates **labor hours only**. ScriBuild prices those hours at **your** hourly rate, so the price follows your numbers. The example below is a real wizard result.

1. Tap **Help me price this** under the price. The job description is filled in from the line. Check **Your hourly rate** ($75 until you change it). Owners and Admins can tick **Remember this rate**.
2. Tap **Estimate the labor**. You get labor steps with hours, crew size and cost, plus up to four quick questions.
3. Read **Check before you quote**: safety and code items such as load-bearing walls, shoring, permits, wiring or plumbing in the wall, and asbestos or lead in older homes.
4. Tap an answer for each question (or **Not sure**) and tap **Update the estimate**.
5. Enter your **Materials** cost. The **Suggested price** is the middle of the labor range plus materials. Change it if you like.
6. Tap **Use $…** to put the price on the line.

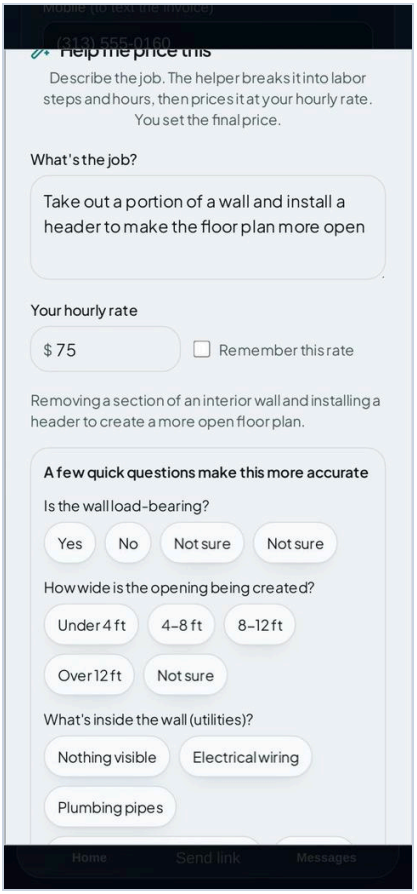

1. Describe the job and your rate

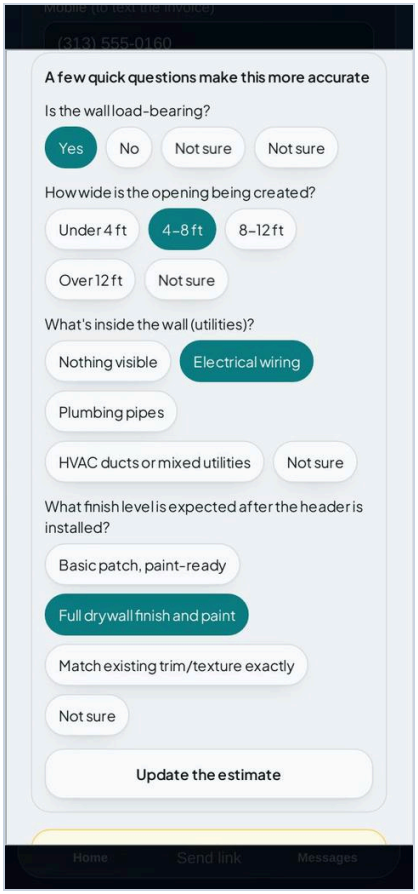

2. Quick questions

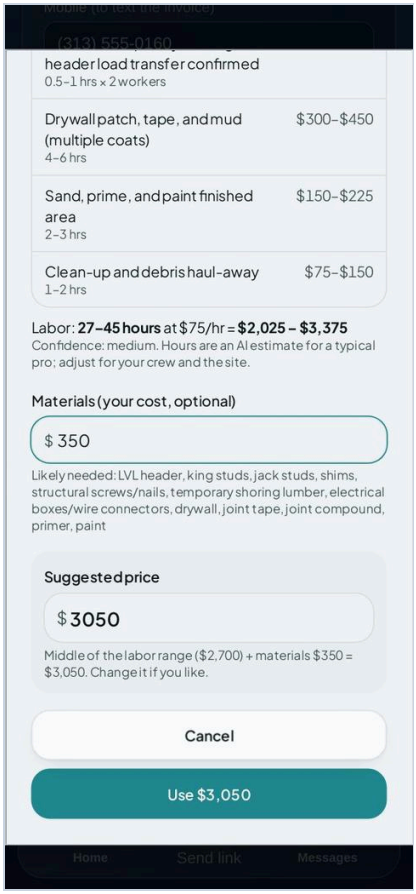

3. Check before you quote

Labor steps, hours and cost

4. Answer and update

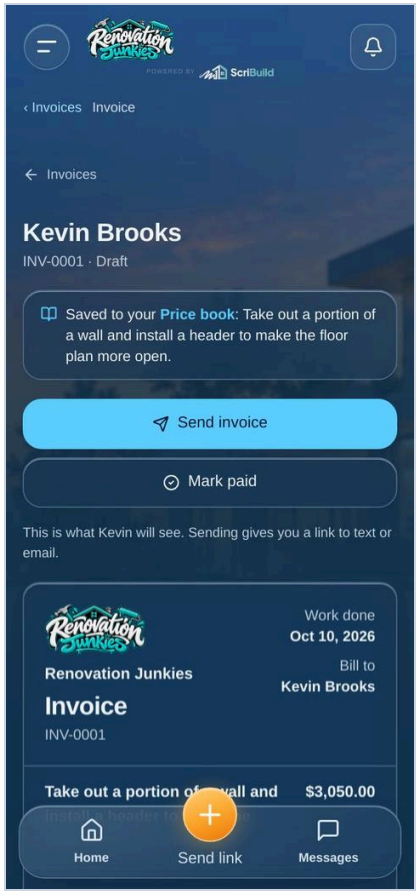

5. Materials and suggested price

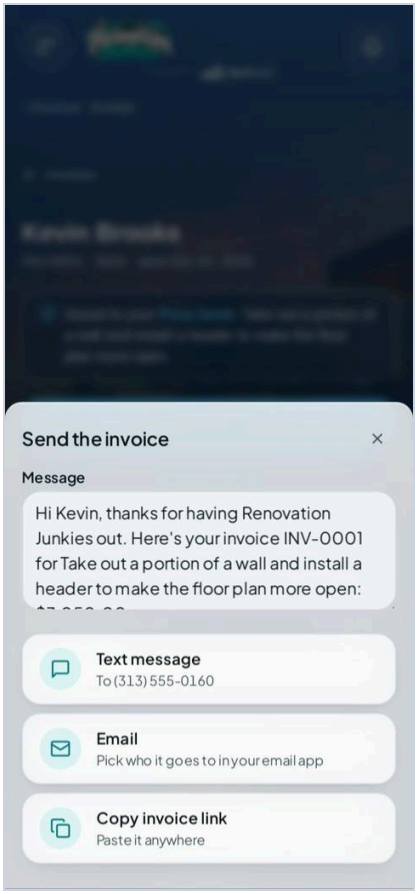

IMPORTANT The wizard is a starting point, not a quote. Hours are an AI estimate for a typical pro. Adjust for your crew and the site, and always act on the “Check before you quote” items.

9.3 Send the invoice and get paid

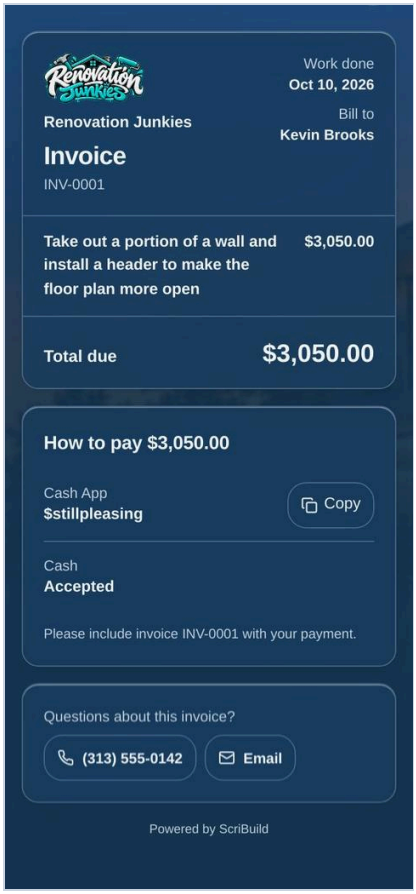

1. On the review screen tap **Send invoice**. Edit the message, then choose **Text message**, **Email** or **Copy invoice link**.
2. The customer opens the invoice and sees your payment options (from Settings → Payment options) with copy buttons.
3. When you’re paid, tap **Mark paid**, choose how they paid (Cash, Check, Zelle, Venmo, Cash App, PayPal, Card or Other), add a note like a check number, and tap **Mark paid**.

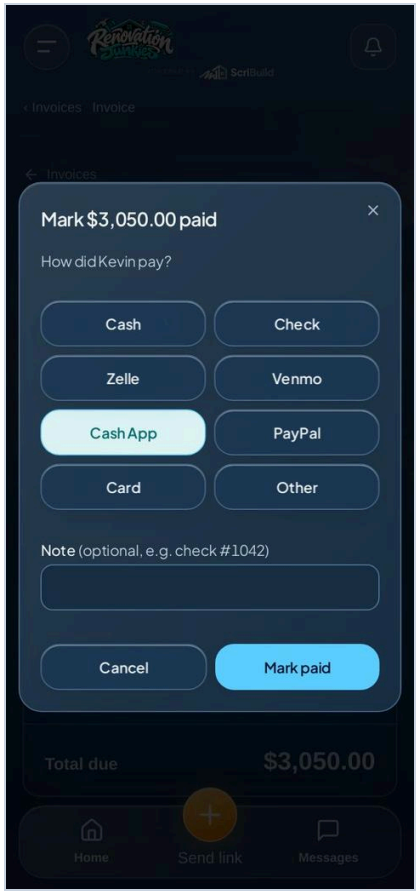

Review

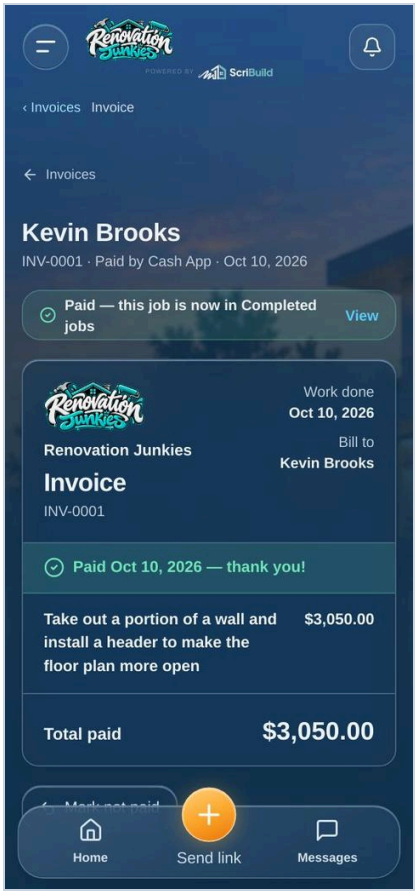

Send the invoice

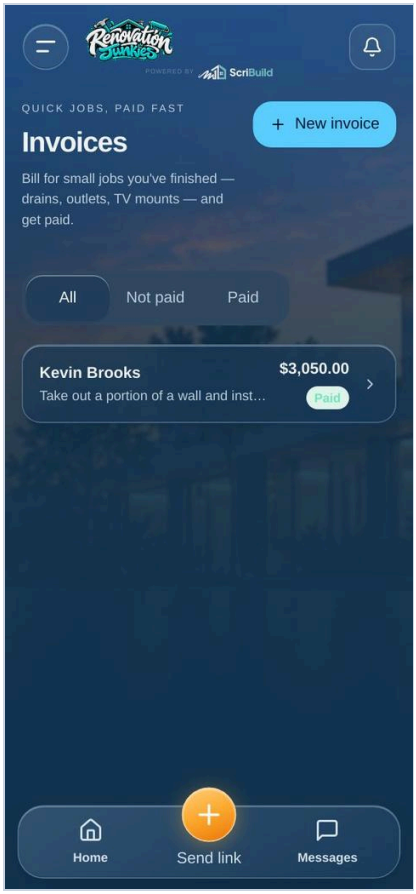

Customer: how to pay

Mark paid

Paid

Invoices: All, Not paid, Paid

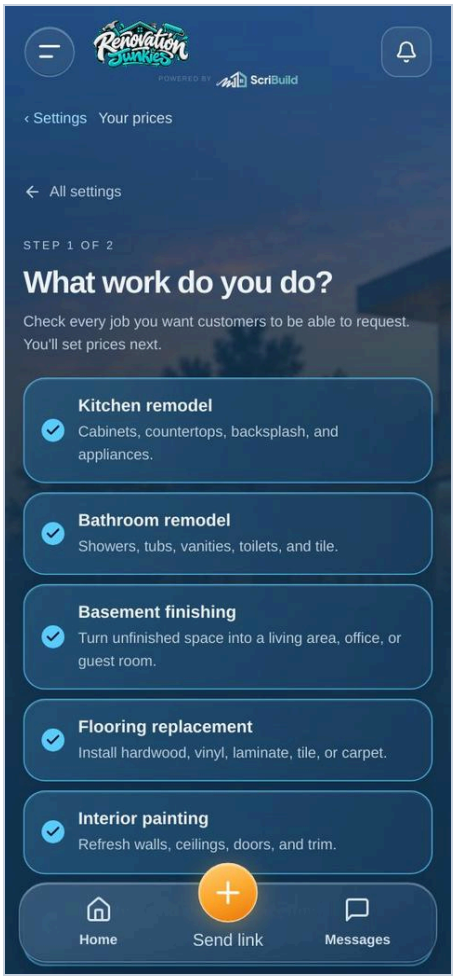

Invoice statuses: **Draft**, **Sent**, **Viewed** (the customer opened it) and **Paid**. You can **Edit**, **Send again** or **Cancel invoice**.

10 Your prices and Instant Quotes

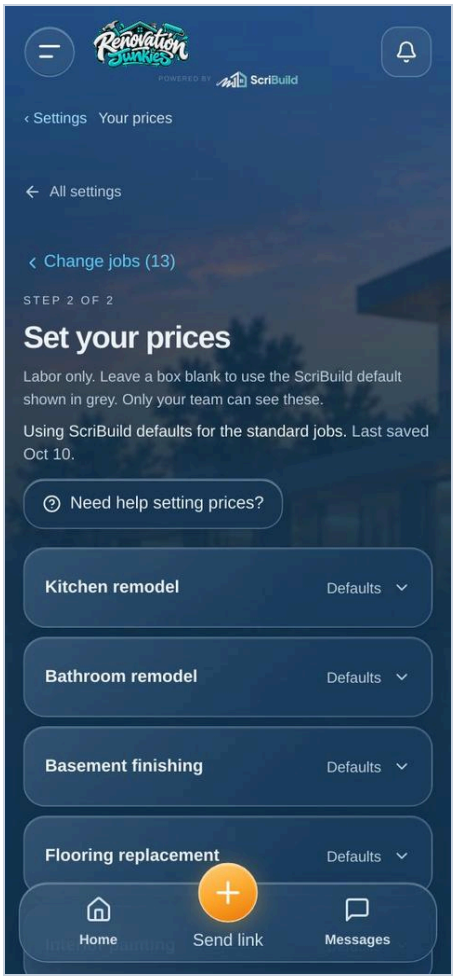

Set the labor rates behind every customer Instant Quote. Only your team can see them.

10.1 Step 1: choose the jobs you offer

Open **Your prices** (menu, or Settings → Your prices). Tap **Change jobs** and check every job customers can request: Kitchen remodel, Bathroom remodel, Basement finishing, Flooring replacement, Interior painting, Window and door replacement, Roof replacement, Exterior renovation, Deck or patio addition, and Room addition or layout changes. Add your own jobs (for example Install GFCI) with **+ Add** or the suggestions.

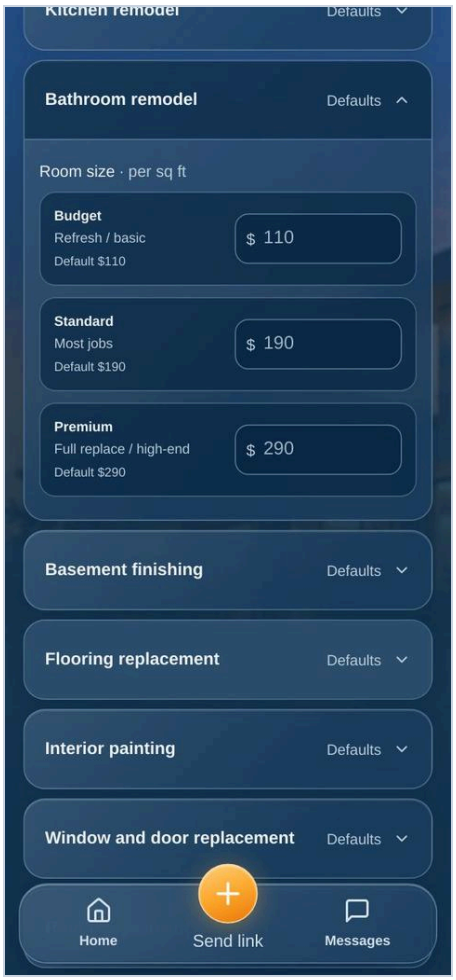

Step 1: What work do you do?

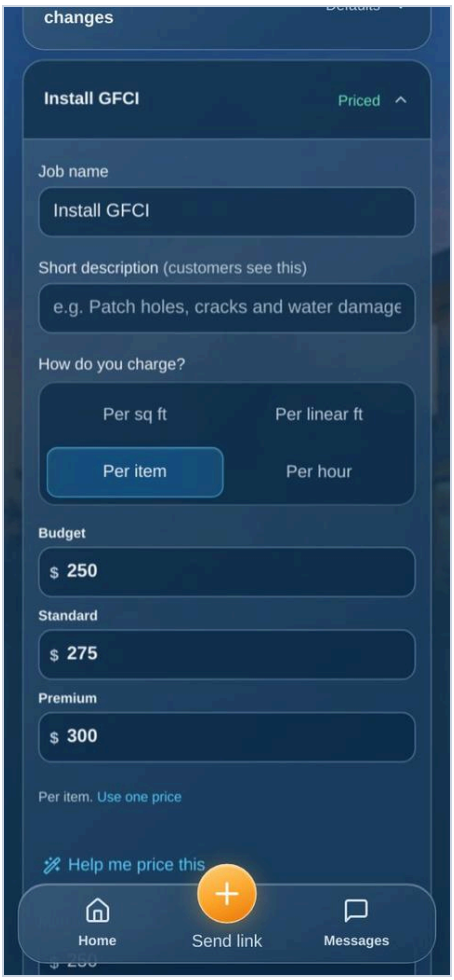

Step 2: Set your prices

10.2 Step 2: set your prices

For each standard job, enter three labor prices per unit: **Budget**, **Standard** and **Premium**. Leave a box blank to use the ScriBuild default shown in grey. Which column a customer gets depends on their answers. For example, “Refresh” uses Budget and “Replace” uses Premium. The three columns also power the Basic, Standard and Premium packages.

Standard job: three prices

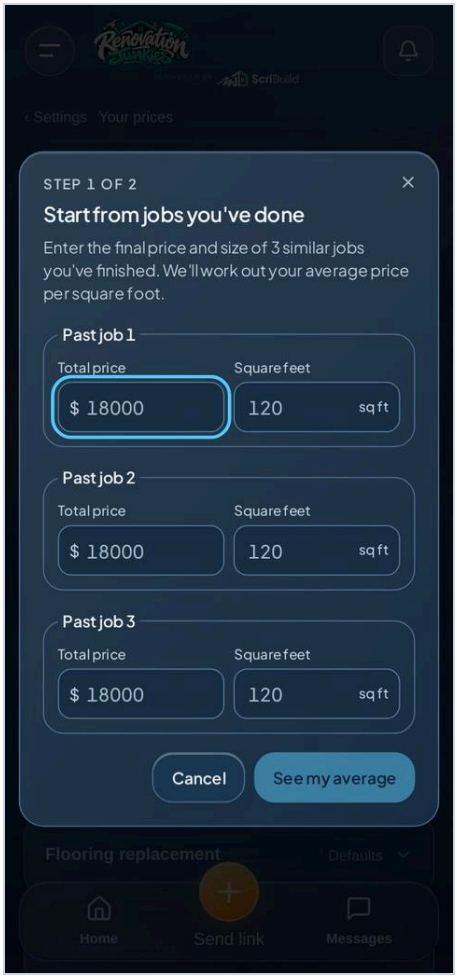

Your own job: Install GFCI

For your own jobs set the name, a short description (customers see it), how you charge (**Per sq ft**, **Per linear ft**, **Per item**, **Per hour**), the price (or Budget/Standard/Premium), a minimum charge, and the typical size ScriBuild assumes if the customer isn't sure. **Help me price this** opens the pricing wizard and turns its total into a per-unit price. Tap **Save prices**.

> **GOOD TO KNOW** New Instant Quotes use your rates right away. Instant Quotes already sent don't change.

10.3 Need help setting prices?

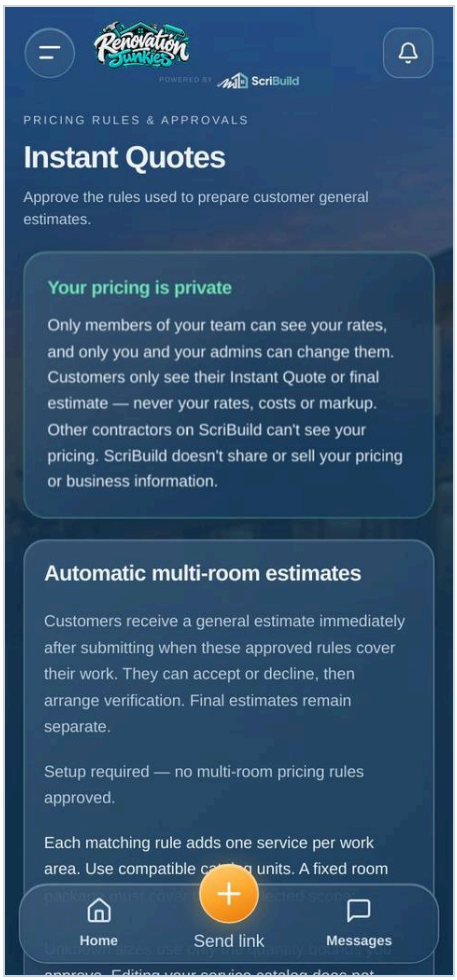

Tap **Need help setting prices?** to start from jobs you've done. Enter the final price and size of 3 similar finished jobs, and ScriBuild works out your average price per square foot.

Start from jobs you've done

10.4 Advanced: Instant Quote rules

Instant Quotes (menu → More pages) is the advanced option. Build multi-room pricing rules from your Price book, review the customer-facing assumptions, and tick the approval to use them for automatic estimates. If you use your own rules, customers see one range instead of three packages. Your pricing is private: customers only see their Instant Quote or final estimate, never your rates, costs or markup.

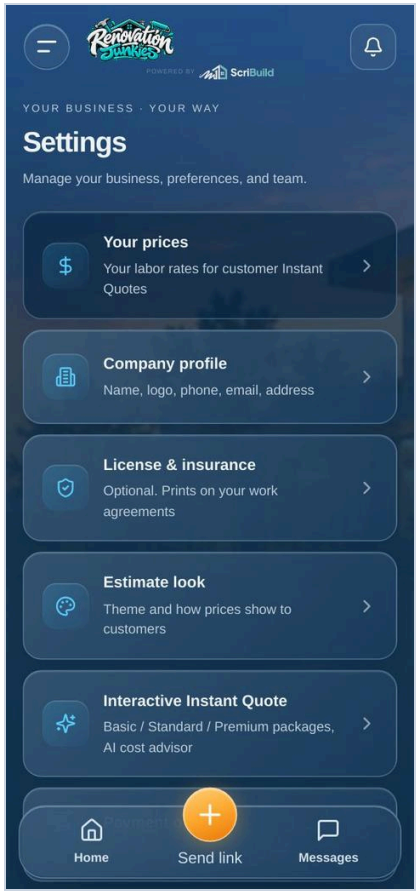

Instant Quote rules

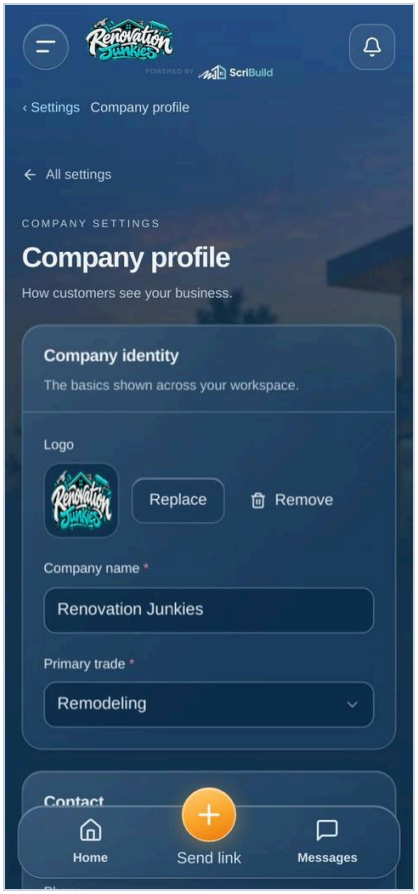

11 Settings

Set these up once. You can change them any time.

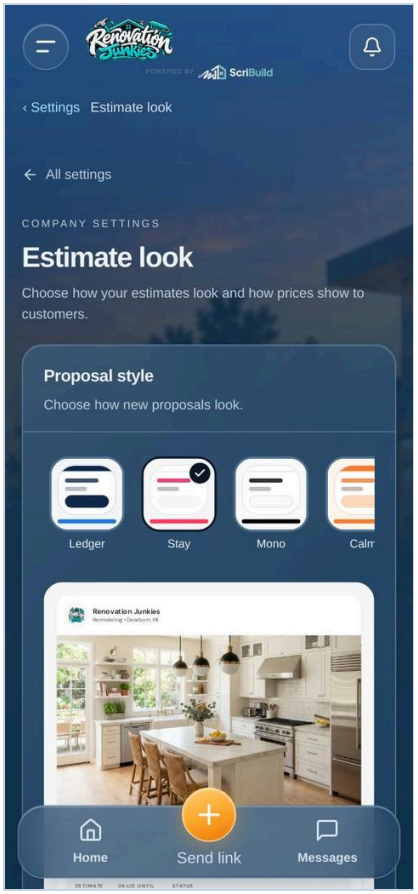

Section	What you set
Your prices	Labor rates for customer Instant Quotes (Chapter 10).
Company profile	Logo, company name, primary trade, phone, email, website, address and service area.
License & insurance	Optional. Legal name, trade name, license number, insurance company and liability limit. They print on your work agreement.
Estimate look	Proposal style (Ledger, Stay, Mono, Calm, Pulse, Ride, Bright) with a live preview, and how prices show to customers.
Interactive Instant Quote	On/off for the Basic / Standard / Premium packages with photos, live total and the AI cost advisor.
Payment options	Zelle, Venmo, Cash App, PayPal, checks payable to, cash, card, and a note. Customers see these on every invoice.
Work agreement defaults	Price type, tax, deposit %, deposit due, milestones, payment methods, materials responsibility and cap, markup, permits, punch list days, warranty, dispute clause and job-type terms. They pre-fill each agreement.
Follow-up reminders	Bell reminders when an Instant Quote isn’t decided, a draft estimate isn’t sent, or a sent estimate has no decision (days are adjustable). Countersign reminders appear right away. Text and email reminders are coming soon.
Accounting & exports	Owners and Admins: filter by date and status, then download an Excel workbook or QuickBooks CSVs (Customers, Invoices, Payments). Import them in QuickBooks Online under Settings → Import data.
Team	Invite a registered email as Admin or Authorized member. They accept under Company invitations. Owners keep control and appoint Admins.

Subcontractors, lists and help.

12.1 Subcontractors

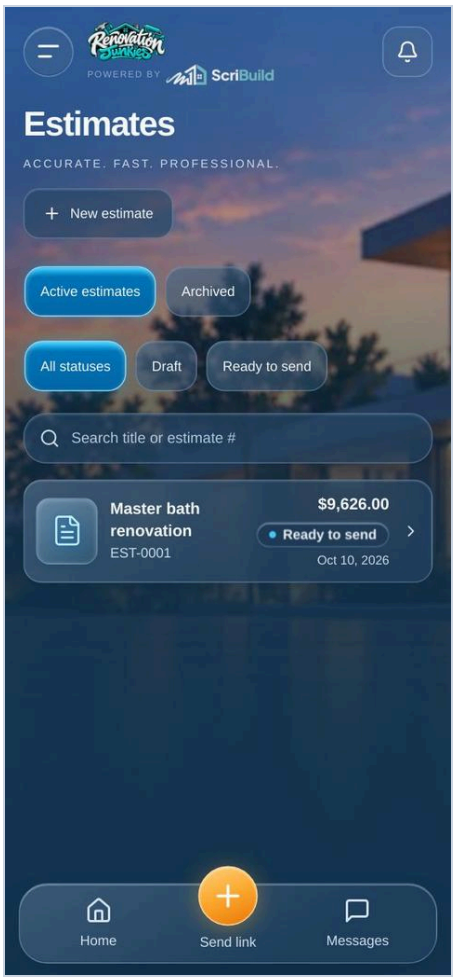

Save the companies you work with once: company name, trade (Cabinets, Countertops, Glass & mirrors, Electrical, Plumbing, HVAC, Drywall, Flooring, Painting, Roofing…), contact, phone, email, best way to reach them, website and private notes. Then send job details or ask for a price in a tap.

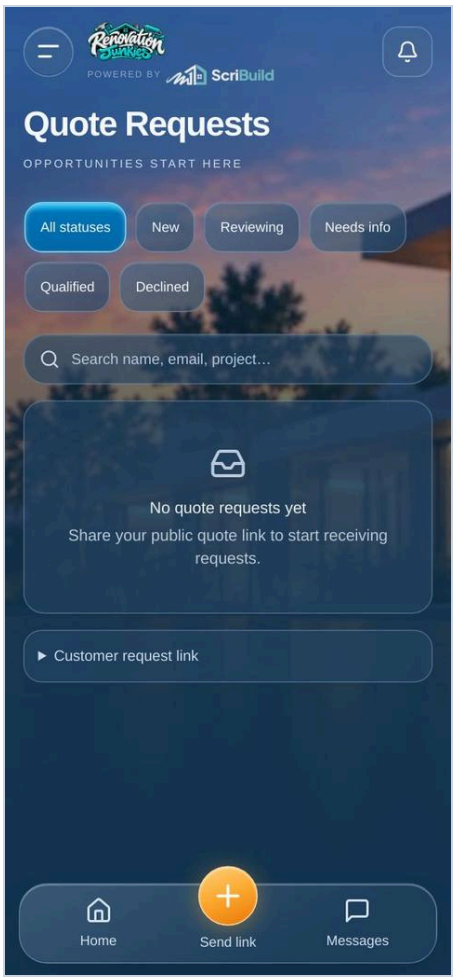

Add a subcontractor

12.2 Estimates and Quote requests lists

- **Estimates**: every estimate, filtered by Active or Archived and by status (Draft, Ready to send), with search.
- **Quote requests**: requests from the older quote form, filtered by status (New, Reviewing, Needs info, Qualified, Declined).

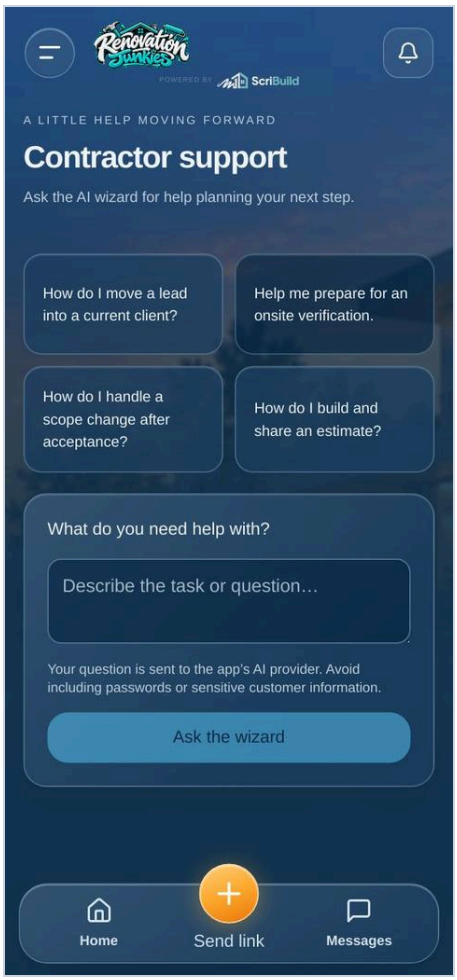

Estimates

Quote requests

12.3 Help: the AI support wizard

Help answers “how do I…” questions about ScriBuild, for example how to move a lead into a current client, prepare for an on-site visit, handle a scope change after acceptance, or build and share an estimate. Type your question and tap **Ask the wizard**. Don’t include passwords or sensitive customer information.

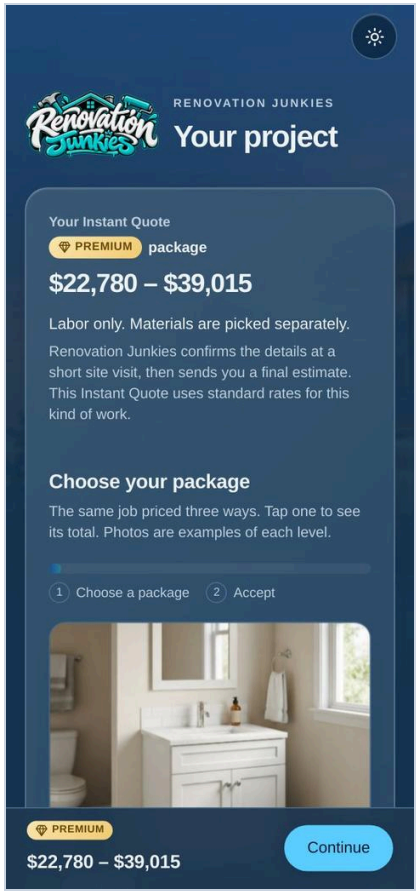

Contractor support

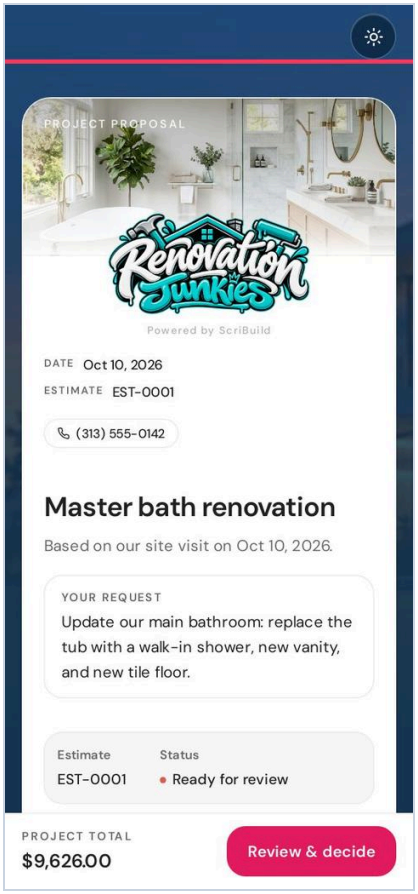

13 Guiding your customer

What the customer sees at each stage, so you can help them on the phone. Send them the separate Customer Guide (PDF) along with your link.

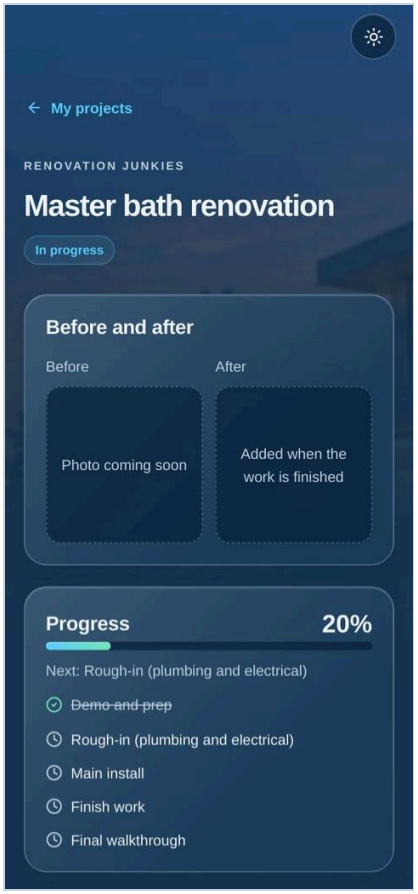

Stage	What the customer sees	In the Customer Guide
After you send your link	Request form → Instant Quote with packages → accept or decline.	Customer Guide, steps 1–8
After they accept	Their project page shows the accepted package and the site visit time, plus a message box.	Steps 9–10
After you send the estimate	A private estimate page: scope, total, price-change note, work agreement, sign and accept.	Steps 11–12
After you schedule the job	A free customer account: progress, updates, payments, change orders to approve.	Steps 13–14
Small jobs	An invoice link with your payment options.	Step 15

Customer account: job

14 Troubleshooting and FAQ

Problem	What to do
A customer lost their project link	Their project page has a Copy project link button. You can also message them, and if they made an account, they sign in at the customer login.
The customer says they didn't get my estimate	ScriBuild doesn't send texts or emails. Open the estimate, tap Copy link, and send it from your phone or email.
"Add at least one line item before marking this estimate ready"	Add a line from your catalog, a manual line, or build a draft first.
I can't set a start date	Both you and the customer must sign the work agreement first. Countersign on the Agreement tab.
My Instant Quotes look wrong	Check Your prices. Blank boxes use the ScriBuild defaults shown in grey. New prices apply only to new Instant Quotes.
A customer wants a different package after accepting	The Instant Quote stays as published. Talk it through in Messages and reflect it in the final estimate.
The customer doesn't see a change order	They approve change orders in their customer account. Ask them to link their account from their estimate page.
I need to remove a test project	Owners and Admins: Delete project in the project file, type DELETE and confirm. It can't be undone.
Gmail / Facebook messages aren't showing	The email & social inbox is coming soon. Use Messages for in-app conversations.

14.1 Glossary

Term	Meaning
Instant Quote	An automatic labor-only price range the customer sees right after their request, built from your prices.
Package	Basic, Standard or Premium. The same job priced three ways.
On-site check	Your visit checklist. Confirm items, measure, and add work you found.
Final estimate	Your priced proposal after the visit. It becomes Attachment A of the work agreement.
Work agreement	The contract the customer signs electronically and you countersign.
Change order	A price or scope change after signing that the customer approves.
Quick invoice	A simple invoice for small finished jobs, outside the project flow.
Price book	Your saved services, used on final estimates and invoices.
